shape and own the future

OUR VISION: To be a leading University of Technology advancing transformative education, pioneering research and innovation, and inclusive development.

OUR MISSION: We empower society through innovative learning, applied research, entrepreneurial graduates, and collaborative partnerships.

OUR CORE VALUES: MY MUT

- **M – Mastery:** Excellence in applied learning, teaching, research, community engagement, leadership, and innovation.
- **Y – Yearning for Growth:** Commitment to lifelong learning, entrepreneurial thinking, and continuous development.
- **M – Mutual Respect:** Fostering inclusivity, diversity, dignity, respect, and ethical partnerships within and beyond the university.
- **U – Ubuntu:** Social responsibility, collaboration, and impact-driven community engagement grounded in shared humanity.
- **T – Transparency:** Commitment to trust, integrity, accountability, and ethical leadership.

OUR STRATEGIC GOALS:

- **Goal 1:** Future-Fit Learning and Teaching
- **Goal 2:** Financial Sustainability
- **Goal 3:** Research, Innovation, and Digital Transformation
- **Goal 4:** Strategic Partnerships, Internationalisation and Visibility
- **Goal 5:** Engaging, Inclusive, and Supportive Environment

MESSAGE FROM THE **STUDENT RECRUITMENT TEAM**

We begin by wishing you every success as you enter the next chapter of your life – becoming a university student. Life rewards those who plan deliberately and purposefully. Have a clear plan, commit to it, and you will succeed.

You are applying to join Mangosuthu University of Technology (MUT) during one of the most exciting periods in our history. We are currently driving our IGNITE 2030 Strategy (2026–2030), and as a prospective student, this strategy is directly relevant to you. At MUT, we want every student to **shape and own the future**. This is our strategic tagline, and we encourage you to apply it to everything you do during your time with us. Continuously ask yourself: Am I shaping and owning my future?

We place great importance on embedding our values into student life. Our values are captured in the MY MUT acronym: **M**utual Respect · **Y**earning for Growth · **M**astery · **U**buntu · **T**ransparency. Practising these values daily will not only shape you as a student, but as a citizen, professional and leader. You are here to change your life, the lives of your family, and to make a meaningful contribution to South Africa and the world. Think boldly – the world is waiting for what you will bring.

We encourage you to make MUT your first, second, and third choice of institution. The competition for places at South African universities is significant, and listing MUT across all three of your top choices considerably strengthens your chances of securing admission. Do not leave your future to chance; be intentional, be strategic, and choose MUT.

We wish you a fulfilling and successful journey, from your first day at MUT to the proud moment you graduate.

From left, Sthembile Maphumulo-Ndlovu, Zama Sishi, Mbali Mkhize, Nganele Dube, and Ayanda Bulose

ABOUT MUT

MUT is a prominent University of Technology (UoT) located in Umlazi, near Durban, South Africa. The University is located on a scenic site overlooking the Indian Ocean and forms part of the academic hub of the eThekwini metropole. It comprises two campuses, the main campus and the North Campus, which are within walking distance of each other.

Here are some key details about MUT:

Location:

511 Griffiths Mxenge Highway,
Umlazi,
Durban,
South Africa

Faculties:

Engineering,
Management Sciences,
Applied and Health Sciences

Established:

1979

Founder:

Prince Mangosuthu Buthelezi

Student life:

MUT offers a vibrant and dynamic lifestyle for its students, with various events and activities that embrace diversity and inclusivity.

MUT Radio:

The University has its own radio station, which reflects its MY MUT values as the station is run by a dedicated team of student volunteers.

Why choose **MUT**?

MUT is strongy committed to community upliftment and social transformation, including equipping students with relevant skills, knowledge and attitudes to be creators of work rather than just employees. Our mission is supported by an affordable and transparent fee structure that promotes access to higher education.

MUT is situated in a strategic location offering a conducive living and learning environment, underpinned by a proud legacy of excellence.

WHAT CAN I **STUDY AT MUT**?

MUT offers diplomas and degrees at undergraduate level that are accredited by professional bodies and are internationally recognised. As a UoT, MUT enables students to experience the world of work through a formalised Work-integrated Learning (WIL) programme. We allow students to achieve their dreams in engineering with a minimum pass of 50% in Maths and Science.

Faculty of Engineering:

- Diploma in Building
- Diploma in Chemical Engineering
- Diploma in Civil Engineering
- Diploma in Electrical Engineering
- Diploma in Mechanical Engineering
- Diploma in Surveying

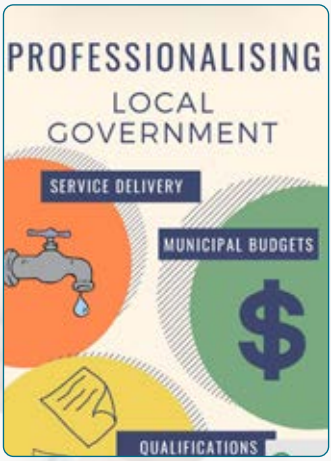

Faculty of Management Sciences:

- Diploma in Accounting
- Diploma in Cost & Management Accounting
- Diploma in Office Management & Technology
- Diploma in Public Finance and Accounting
- Diploma in Local Government and Finance
- Diploma in Public Management
- Diploma in Marketing
- Diploma in Human Resource Management

Faculty of Applied and Health Sciences:

- Diploma in Agriculture
- Diploma in Analytical Chemistry
- Diploma in Community Extension
- Diploma in Information Technology
- Diploma in Nature Conservation
- Bachelor of Science in Environmental Health
- Bachelor of Applied Science in Nature Conservation
- Bachelor of Science in Medical Laboratory Science

We also offer a number of postgraduate study opportunities.

How to apply

Applications are done online through the Central Applications Office (CAO) accessible on www.cao.ac.za. The University website (www.mut.ac.za) provides clear guidelines on the application process and fee structures.

Applications are open from 1 March to 30 September, with late applications accepted until 30 November.

Documents required for application

SOUTH AFRICAN APPLICANTS	NON-SOUTH AFRICAN APPLICANTS
• Grade 11 final results, Grade 12 June exam results, National Senior Certificate (NSC) or Statement of Results (whichever is the latest) • Identity document • If transferring from another university, submit your academic record and a certificate of good conduct.	• Valid passport • Valid medical insurance cover • Police clearance certificate • SGCE, GCE, GCSE, IGCSE or Cambridge School Certificate

Make MUT your first choice!

- Each year, students ask us why they should apply on time and make MUT their first choice. Choosing MUT as your first preference is a clear demonstration of your commitment and allows you to stand out in a highly competitive admissions process. With more than 100 000 applications received annually, listing MUT first significantly improves your chances of being considered.
- Applicants who meet the minimum qualification requirements benefit from prompt attention, increasing their likelihood of securing placement and becoming part of the MUT community ahead of many of their peers.

Qualifying to study

Admission requirements vary by programme, but generally include a National Senior Certificate with a diploma pass or an equivalent qualification. Selection is based on the Admission Points Score (APS) system, and applicants are required to meet a minimum of 25 points, including a Level 4 pass in English and other relevant subjects.

How to calculate your points for admission

National Senior Certificate (NSC)		
NSC LEVEL RATING	**NSC PERCENTAGE**	**POINTS**
	90 – 100	8
7	80 – 89	7
6	70 – 79	6
5	60 – 69	5
4	50 – 59	4
3	40 – 49	3

Senior Certificate*		
SYMBOL	POINTS	
	HIGHER GRADE	STANDARD GRADE
A	8	6
B	7	5
C	6	4
D	5	3
E	4	2

* This applies to prospective students who wrote the old Senior Certificate examination, prior to the introduction of the NSC. Admission points are allocated according to the level passed (Higher or Standard Grade).

Admission requirements for international applicants

AS Level – symbol A,B,C **OR** D **OR** **A** Level – symbol A,B,C,D **OR** E	**Three of the five subjects** must have been passed at the **same examination sitting**. This applies to learners from SADC countries.

Did you know you can afford to study at MUT?

Providing access to academically deserving students is our main objective, and we believe your financial circumstances should never stand in the way. That is why MUT offers the most competitive tuition fee structure, averaging between R14 530 per semester depending on the course and subjects. Residence fees averating between R13 000 per semester. Our financial aid resources and policies ensure that MUT is affordable for all prospective students.

National Student Financial Aid Scheme (NSFAS)

The scheme was established by the Government to provide financial support to disadvantaged South African students who wish to further their studies at public higher education institutions. NSFAS offers subsidised free higher education and training to academically deserving underprivileged and working-class South Africans.

MUT **QUALIFICATIONS** AND **CAREER PATHS**

MUT
MANGOSUTHU
UNIVERSITY OF TECHNOLOGY

Faculty of Engineering

The Faculty of Engineering at MUT has graduated thousands of professionals since the first MUT graduation in 1986. Regardless of which programme you choose within the faculty, MUT will lay a strong foundation for your career to enable you to transform lives. Pursuing your Engineering qualification, you will be required to move beyond the classroom and get hands-on training in the field through Work-integrated Learning (WIL).

Engineering programmes are about the design and production of useful products and services. Engineers convert scientific knowledge into technology, and technology into successful advancement. At MUT we offer diplomas in Chemical, Civil, Surveying, Electrical, Building, and Mechanical Engineering.

Minimum subjects required:

- English | Maths | Physical Science
- All at 50% and above
- Further departmental screening processes

Engineering qualifications and entry requirements

Qualification	Minimum requirements per subject		CAO code	Duration

Engineering qualifications and career opportunities

Diploma: Chemical Engineering

Chemical Engineering is an area of study which prepares individuals to apply mathematical and scientific principles to the design, development and operational evaluation of systems employing chemical processes – such as chemical reactors, kinetic systems, electrochemical systems, energy conservation processes, heat and mass transfer systems, separation processes, analysis of chemical problems such as corrosion, particle abrasion, energy loss, pollution and fluid mechanics.

Professional Chemical Engineering Technicians are characterised by the ability to apply proven, commonly understood techniques, procedures, practices and codes to solve well-defined engineering problems. They manage and supervise chemical engineering operations, construction and activities. They must therefore have a working understanding of the engineering sciences underlying the techniques used, together with financial, commercial, legal, socio-economic, health, safety, and environmental methodologies, procedures and best practices. The process of professional development of a Professional Chemical Engineering Technician typically starts with the attainment of a Diploma in Chemical Engineering.

Diploma: Civil Engineering

Civil Engineering is a professional engineering discipline that deals with the design, construction and maintenance of the built environment, including public works such as roads, bridges, canals, dams, airports, harbours, sewerage systems, pipelines, and the structural components of buildings and railways.

The course qualifies the technician for employment with civil engineering contractors, consultants, and Government departments or municipalities, where he/she would form part of a team usually managed by a professional engineer or technologist. The technician could be involved in the design and construction of civil engineering structures such as roads, bridges, dams, railways, harbours, buildings and airports.

Diploma: Surveying

Scaled base maps are essential to any construction planning or development of land. The course qualifies the student as a surveyor who has the ability to prepare maps of various scales set out for the required structures, transportation routes, industrial and residential properties.

Diploma: Construction Management & Quantity Surveying (Building)

Construction management is concerned with organising, scheduling, mobilising and directing equipment, material and personnel in performance of a construction contract. A quantity surveyor is responsible for estimating the amount and cost of materials and labour needed for building, and how long it will take to complete a building project.

After completing the course, students specialise in either construction management or quantity surveying. The course provides essential skills and knowledge needed in the construction of housing, schools, community facilities and other building projects.

Diploma: Electrical Engineering

A qualifying learner will be competent to apply technical knowledge, engineering principles and problem-solving techniques in the field of Electrical Engineering by operating within the relevant standards and codes, in collaboration with other members of an engineering team. The qualified person will be able to register with the Engineering Council of South Africa (ECSA) as a Technician-in-Training in the field of Electrical Engineering.

A learner who successfully completes this qualification will be able to:

- practise Electrical Engineering activities and applications at the level expected of a Professional Technician (Engineering), and
- manage Electrical Engineering activities and applications at the level expected of a Professional Technician (Engineering).

Diploma: Mechanical Engineering

Mechanical Engineering is the branch of engineering that focuses on the design, analysis, manufacturing, and maintenance of machines and mechanical systems. The Department of Mechanical Engineering at MUT:

- prepares industry-ready technicians by combining theoretical knowledge with practical application to support technological and socio-economic development;
- develops strong foundations in mathematics, engineering sciences, design, and problem-solving, with awareness of environmental and societal impacts;
- equips graduates for diverse industries and employment opportunities across a wide range of sectors, including the manufacturing, automotive, shipbuilding, and aerospace industries, as well as in power generation and mining operations. Additional career prospects exist in renewable energy systems, oil and gas, construction and infrastructure development, maintenance and reliability engineering, consulting engineering firms, and research and development environments.

Mechanical Engineering offers three programmes: a three-year mainstream programme, a four-year extended curriculum programme, and an access course programme.

Faculty of Management Sciences

Management Sciences is an interdisciplinary faculty encompassing the study of problem-solving and decision-making. It focuses on providing skills and knowledge around the management of organisations, providing learning opportunities for aspiring managers and leaders. Management sciences are concerned with developing and applying models and concepts that help to tackle management issues and solve managerial problems.

The Management Sciences faculty offers diplomas in Accounting, Cost and Management Accounting, Public Finance & Accounting, Human Resource Management, Marketing, Office Management & Technology, and Public Management.

Minimum subjects required:

- English | Maths | Accounting
- All at 50% and above
- Further departmental screening processes

Management Sciences qualifications and entry requirements

Management Sciences qualifications and career opportunities

Diploma: Accounting

This qualification provides accountancy knowledge and skills to ensure competence in performing reporting functions, rendering taxation services and management advisory services on an Accounting Technician level, and converting this embedded knowledge practically into accounting software.

Hence, the rationale and the purpose for this qualification is to provide a well-rounded, technically-focused education that equips learners with technical knowledge, proficiency and pervasive skills which will enable them to demonstrate initiative and responsibility; and which will enable the development of practical and operational focused qualities.

Diploma: Local Government Finance

The purpose of this qualification is to enable qualifying learners to apply strategic financial management competencies to ensure effective, efficient and economical utilisation of public funds at local government level. Learners will, therefore, develop competencies to manage strategic planning and budgeting processes, financial management processes and internal controls, auditing and reporting processes. Qualifying learners will benefit through the enhancement of their personal competencies, knowledge and skills, making them better equipped to complete tasks required in their employment contracts and applicable legislation.

Diploma: Public Finance and Accounting

The need for well-qualified, efficient and client-oriented public officials has been identified as a priority in all three spheres of government. The purpose of this qualification is to provide a structured programme for public officials that work with senior management officials, in order to provide support to strategic leadership and management. Consequently, this qualification consists of exit learning outcomes covering accounting reporting, administration, auditing, budgeting, economics, information systems, business calculations and legislative framework for the public sector.

Diploma: Cost and Management Accounting

The purpose of this qualification is to provide the learner with the knowledge, skills and experience to become a Management Accountant. In the process, the learner will also benefit from embarking on a path of life-long learning (leading to independence and self-reliance) and social transformation (due to the development of critical and analytical thinking and the development of a questioning approach).

Diploma: Human Resource Management

This course covers all the necessary activities involved in the provision and maintenance of human resources within an organisation. This includes recruitment, payroll management, human resource development and organisational development, to name a few. Graduating students will have the requisite knowledge to easily join organisations in roles such as Skills Development Facilitators (SDFs), Employee Assistance Plan Managers (EAPs) and many other human resource management positions.

The Human Resources Practitioner or Manager has an important role to play in ensuring that an organisation has a suitably skilled and efficient workforce. The diploma qualifies students for a range of HR occupations in the areas of recruitment, employee benefits, and talent development management.

Diploma: Marketing

This qualification develops Marketers from entry to middle management level. This is achieved through the delivery of up-to-date marketing content, but also by developing soft skills such as organisation, problem-solving, people-centredness, and digital and information literacies. The qualification provides the entry point into the diverse field of marketing; hence it prepares future marketers for various industries.

The qualification aims to teach marketing/business skills which include:

- Marketing planning and implementation of marketing plans
- Customer relationship management (CRM)
- Digital and traditional marketing strategies

- Comprehension and analysis of the customer decision-making process (DMP) and how to manage it effectively
- Bazaar segmentation, targeting and brand/product positioning
- How to optimise the concept of the marketing mix to deliver superior service quality and outperform competitors.

Diploma: Office Management & Technology

This programme provides students with professional administrative and communication skills. It is intended for those students wishing to become Administrative Assistants, Secretaries, Personal Assistants, or Office Professionals at an intermediate level in any sector of the economy. At the end of the programme, students will be able to provide independent and competent management support, which enables them to plan and execute tasks creatively, professionally and efficiently.

The course gives students the business and administrative skills and knowledge to understand how business operates and to administer an office efficiently.

Diploma: Public Management

This programme equips students with the theory and practical skills needed to administer and manage the provision of government services effectively and efficiently.

The government provides many essential services to communities in South Africa, including housing, education, transport and the provision of municipal services through local government. A huge administrative infrastructure employing thousands of public servants organises the delivery of these services through the various government departments.

Recognition of Prior Learning

Applicants who do not meet the minimum requirements may be granted Recognition of Prior Learning (RPL) in recognition of competencies attained in the public sector workplace. The application of the RPL programme will be guided by the RPL Policy of the University.

Faculty of Applied & Health Sciences

The Faculty of Applied & Health Sciences offers Bachelor's degrees in Environmental Health, Medical Laboratory Sciences and Nature Conservation. It also offers national diplomas in Agriculture, Analytical Chemistry, Community Extension, Information Technology and Nature Conservation.

Minimum subjects required:

- National Senior Certificate
- English | Maths | Physical Science | Agricultural Science | Life Sciences
- All at 50% and above
- Further departmental screening processes

Applied and Health Sciences qualifications and career opportunities

Bachelor of Health Science: Medical Laboratory Sciences (BHSc-MLS)

The four-year programme includes clinical practice in an accredited Training Laboratory for the last 18 months of the programme. In the fourth year of study, learners need to select an area of specialisation in which they will practise, from one of the following disciplines: Clinical Chemistry, Clinical Pathology, Cytogenetics, Cytopathology, Haematology, Histopathology, Immunohaematology, Immunology, Microbiology, Virology, Forensic Science and Pharmacology.

Bachelor of Science: Environmental Health

Environmental Health Practitioners are trained to serve as the first line of defence against disease by preventing and controlling environmental health risks and protecting public health in communities and public environments. All students who take up the course will be registered with the Health Professions Council of South Africa (HPCSA).

Job opportunities include Environmental Health Practitioner (EHP); Waste Management Officer; Safety, Health, Environmental and Quality Management Officer; Occupational Health and Safety Officer; Environmental Management

Officer; Veterinary Public Health Officer; Meat Inspector; Water Quality Technologist; Food Safety Officer; Disease Surveillance Officer and Environmental Protection Officer.

Diploma: Agriculture

Students are prepared theoretically and practically, for a career in the fields of agricultural development or extension and to promote the development of sound agricultural practice in the farming industry.

Diploma: Agriculture: Animal Production

Students are equipped with theory in all aspects of animal production and practical application of animal production in industry and extension contexts.

Diploma: Analytical Chemistry

This course equips technicians with the foundational and advanced competencies required for employment in analytical laboratories. In these settings, a wide range of analysis is conducted using both traditional wet chemical techniques and advanced instrumental methodologies. Graduates of the course are prepared to work in routine analytical quality control laboratories as well as in research-oriented environments that investigate and develop novel manufacturing processes and analytical techniques.

Diploma: Community Extension

This diploma aims to train students to improve the standard of living of rural communities by:

- motivating communities to participate in self-help projects, particularly in order to promote food security and alleviate poverty; and
- effectively communicating improved functioning of rural and urban households by extending domestic, social and agricultural skills into the communities.

Diploma: Information Technology

This diploma equips students with the knowledge and practical skills required to develop, manage and support modern IT systems within distributed and technology-driven environments. The programme is designed to prepare graduates for the fast-evolving digital world

by combining strong theoretical foundations with hands-on, industry-relevant experience. Graduates of the Diploma in IT are equipped for careers in a wide range of industries, including software development, networking, systems support, data management, and digital transformation initiatives.

Students may choose from the following current areas of specialisation:

- **Software Development:** This specialisation empowers students to design, develop, test and maintain software products and systems that meet specified user and business needs. Emphasis is placed on creating solutions that are secure, reliable, efficient and cost-effective through both the development and maintenance phases. Possible software development career paths include: Application Developer; Software Programmer; Systems Developer; Systems Analyst and Database Administrator.
- **Communication Networks:** This specialisation provides students with the knowledge and technical skills to design, implement, manage and support computer networks. Students gain expertise in modern network topologies, communication protocols and infrastructure technologies, enabling effective communication and secure information sharing within organisations. Possible career paths include: Network Designer; Network Administrator; Network Support Specialist; and IT Infrastructure Technician.

Diploma: Nature Conservation

This diploma caters for the human resources needs of conservation organisations, and also aims to initiate self-employment opportunities for students by providing theoretical and practical expertise in the field of conservation studies. This is a functional and well-recognised qualification, which is a prerequisite for appointment and promotion as a Nature Conservator.

Bachelor of Applied Science: Nature Conservation

The purpose of the Bachelor of Applied Science in Nature Conservation is to supply the nature conservation industry with competent nature conservation scientists to identify, investigate and evaluate biodiversity issues. The department believes that it can provide a service to industry with a focused Applied Science Degree, leading to an Honours degree and then a research Master's and Doctorate which run parallel with the current suite of diplomas and Master's of Conservation.

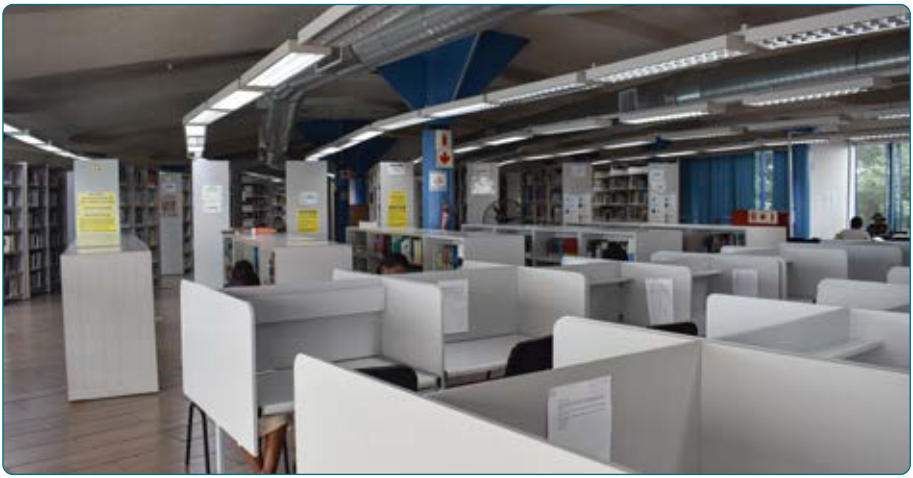

MUT **LIBRARIES**

MUT Library Services provides a wide range of instructional services to assist staff and students in the use of information sources and library facilities. MUT has two libraries – one on the Main Campus, and another on the North Campus. Our libraries provide comprehensive access to a wide range of material across all faculties and disciplines.

Main Library

The Main Library is located **opposite the Student Centre** and has three floors designed to support your learning needs.

- **First Floor:** This floor houses the print book collection, faculty librarians, the circulation desk for borrowing and returns, and quiet study areas.
- **Ground Floor:** The ground floor has a large computer lab with 100 computers available for undergraduate students. There is also space for students who wish to use their own laptops.
- **Lower Ground Floor:** This floor includes the Technical Services section, which is not accessible to students. The other wing features a training computer lab, a postgraduate computer lab, and the Learning Commons, which is used for university meetings, workshops and events.

Applied and Health Sciences Library

The Applied and Health Sciences Library is located on the **second floor of the North Campus**. The library is currently undergoing renovations, and as a result, only limited services are available at this time.

Library Hours

Main Library

Monday – Thursday:	8am – 9pm
Friday:	8am – 6pm
Saturday:	8am – 4pm
Sunday & Public holidays:	Closed

Applied and Health Sciences Library

Monday – Saturday:	8am – 4pm
Sunday:	Closed

CAMPUS **LIFE**

University is where you will discover who you are, build friendships that last a lifetime, and create memories you will carry long after graduation. At MUT, we are deeply committed to making your time with us as fulfilling, enriching and enjoyable as possible – both inside and outside the classroom.

We know that succeeding at university requires more than academic effort alone. When you feel well, supported and connected, you are far better placed to perform at your best. That is why we encourage every MUT student to work hard in their studies while also investing in their social life, exploring new interests, and taking care of their physical and mental wellbeing.

MUT offers a wide range of student support services not just to help you get through your degree, but to equip you with the confidence, resilience and skills that will serve you for life.

At MUT, you will always find a community that is rooting for your success.

Clubs and societies

A range of active social and religious clubs are available for MUT students to explore their passions and contribute to the wellbeing of fellow students – now and in the future. The following clubs and associations are available and open to all students:

ACTS (Roman Catholic)	MUTISA
ACUSO (cultural society)	NATESA
ANCYL	PERFORMING ARTS
ANSOC (Anglican)	SADESMO
ATEZ (Zionists)	SASCO
BMF (Black Management Forum)	SCO
BTG (Back to God)	SDASM
CAMPUS IMPACT	SPECTRUM
EFFSC	SWD (Students living with disabilities)
ELCSASO (Lutheran)	SWEEP
INDLAMU	TACTSO
IZIMBALI ZE MUT	TASA
JAZZ and FUSION	UMKHONTO STUDENT MOVEMENT
METHSOC	YCL
MUT CHOIR	ZCCFC

Student health services

MUT Student Health Services afford students access to a fully equipped on-campus clinic where you will be attended to by professional nurses and a part-time medical doctor from Monday to Thursday between 8am and 3pm, and on Friday between 8am and 12pm. First aid care and ambulance transportation to the nearest hospital are also provided to students after hours.

Sport and recreation

Sport and recreation plays a vital role in the holistic development of students by providing activities that promote a healthy balance between academic responsibilities and social life. Programmes delivered by the MUT Sport and Recreation Unit incorporate essential values such as friendship, fair play, discipline, and cooperation among students – many of whom will go on to occupy key leadership positions in various industries. These programmes create opportunities for young leaders to interact, build lasting friendships, and contribute to the development of a cohesive university community, while promoting mutual understanding among students from diverse backgrounds.

The transition from high school to university is widely recognised as a challenging period for many students, largely due to the significant differences between the two environments. In this regard, sport plays a critical role in creating a supportive and inclusive atmosphere. Beyond the physical benefits, participation in sport contributes significantly to students' mental and emotional well-being. Regular physical activity stimulates the release of endorphins, which help reduce stress and promote positive feelings, thereby supporting overall mental health.

MUT Sport is a proud member of University Sport South Africa (USSA), the national umbrella body for university sport. All priority and competitive sport codes are registered with the relevant local sport federations and actively participate in leagues and other organised sporting events.

In addition to competitive sport, the Unit hosts a variety of fun-filled recreational events and programmes throughout the academic year. These activities are designed for students who are interested in maintaining or improving their health and well-being rather than engaging in formal competition.

MUT therefore offers a diverse range of sport and recreational activities that promote healthy living, recreational physical activity, sporting competitiveness, and overall wellness for the entire university community, including:

Aerobics	Dance
Athletics	E-Sport
Basketball	Football
Bodybuilding	Karate
Boxing	Netball
Cheerleading	Supa Pool
Chess	Volleyball
Cricket	

All sport facilities are conveniently located within walking distance of the Main Campus. A student fitness gymnasium is available and accessible to all registered students.

For enquiries, please contact the Sport and Recreation Unit on (031) 907 7356 or email sports@mut.ac.za

Living in one of MUT's residences, you and your classmates will share a range of experiences and aspirations. You will live in a diverse community of students and create lasting friendships.

Student accommodation and residence life

MUT
MANGOSUTHU
UNIVERSITY OF TECHNOLOGY

MUT is a home – a place where you can belong!

There is a diverse range of housing options ranging from traditional residences to apartments. MUT offers 1680 beds to new students on the Main Campus. This means first-year students are prioritised for accommodation in the on-campus residences.

While each residence at MUT has unique features and amenities, all provide reasonable quality accommodation, facilities and resources. Both on-campus and off-campus student residences have established governance processes, a formal management structure, and offer similar access and control systems, as well as basic and reasonable accommodation that is conducive to living and learning.
