

```
// =====
// COURSES PAGE — SA undergraduate programmes
//
// Programme "aps" numbers in the data are stored on the COMMON
// standard APS scale (best 6 academic subjects, LO excluded, max 42).
// At runtime, scoreForUniversity() computes each university's OWN
// prospectus score, and convertStandardApsToUniScale() maps the
// stored minimum onto that scale for a fair comparison:
//
// • UP, UJ, Rhodes, UFS, most UoTs, UNISA ... standard APS (max 42)
// • UKZN, NWU ..... 1–8 scale (max 48)
// • UCT, NMU ..... FPS / Applicant Score (max 600)
// • Stellenbosch ..... TPT percentage average
// • Wits ..... best 7 incl LO + Eng/Maths bonus
// • UWC ..... best 7 including LO
//
// Meeting a minimum does NOT guarantee admission. Competitive
// programmes often admit well above the published floor.
// Always verify the official university prospectus for your intake year.

{ name: "Bachelor of Child and Youth Care", aps: 30, duration: "4 years", description: "A four-year professional degree providing students with skills, knowledge and experience of working in a variety of child and youth care settings. Major focus is on the development and healing of the child within family, community and other settings. Involves holistic care, behaviour management, developmental assessment and programming to optimize health and well-being of young people and families. Child and youth care worker does not undertake traditional therapy; rather, purposefully creates and uses a developmental and therapeutic milieu, building a therapeutic relationship with the child, promoting healing and development through conscious use of events as they occur in the life-space. Works with psychologists, social workers and teachers on an equal footing within the multidisciplinary team. Additional entry requirements: interview, entrance assessment, proof of minimum 20 hours voluntary work or employment with children, youth, families or communities. Only considers if placed as 1st, 2nd or 3rd choice. Jobs: Residential child and youth care/treatment centres; state facilities; probation programmes; street shelters; educare centres; community development projects; assistant probation officers in law courts; day-care and play-care centres; hospitals caring for abandoned children; mediators and facilitators; hostels; diversion programmes; wilderness training; schools and after-school care; youth development programmes; intermediaries in court settings.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Chiropractic", aps: 35, duration: "4 years (BHSc) + 1 year (MHSc) + 1 year internship", description: "The chiropractor is concerned with the treatment and prevention of disorders involving the neuro-muscular-skeletal system. Trained to diagnose disorders, care for the human frame in health and disease, and consult with or refer to other health-care providers. Therapy consists of specific manual treatment (spinal adjustment, other manipulations), nutritional advice, exercise programmes, stress management, electrotherapy, massage, acupuncture and traction. Academic programme extends over five years of full-time study (4 years BHSc Chiropractic and 1 year MHSc Chiropractic). First three years provide thorough grounding in traditional medical subjects with special emphasis on diagnostic skills. Following two years prepare student to consider the patient as a whole with particular attention to neuro-muscular-skeletal disorders. Students taught to diagnose diseases as medical doctors, and trained in taking and interpretation of X-ray films, CT scans, MRIs and bone scans. Final year (MHSc) includes treating patients in the clinic. Completion followed by a year of internship under the Allied Health Professionals Council of South Africa. Additional entry requirements: over 17 years of age, physically fit, extensive screening process, selected candidates invited to interviews. First preference given to applicants with both Physical Science and Life Science or Biology.

Jobs: Private practice on own or in partnership with existing practitioners.",

{ name: "Bachelor of Health Sciences in Clinical Technology", aps: 30, duration: "4 years", description: "Develops a learner to possess knowledge, skills, attitudes and values to practice as a Clinical Technologist as part of a multi-disciplinary team in one of the following specialist categories: Cardiology, Cardiovascular Perfusion, Critical Care, Nephrology, Neurology, Pulmonology or Reproductive Biology. Qualifying learner can independently perform diagnostic, therapeutic and corrective procedures on patients using specialised health technology. Enables engagement in research and contribution to new knowledge. Designed to provide specific clinical technology skills and competencies in management and research. Mandatory registration as a Student Clinical Technologist with the Health Professions Council of South Africa. Additional entry requirements: industrial knowledge, interviews, selection committee and/or aptitude test. Applicants with 25 points and more stand a greater chance. Jobs: Provincial and private hospitals in Critical Care units, Lung Function units, Renal/Dialysis units, EEG and Sleep Laboratories, Cardio-thoracic surgery, Cardiac Catheterisation Laboratory & Cardiac Clinic or Assisted Reproductive Biology Laboratories.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }, { subject: "Mathematics", minPercent: 70 }, { subject: "Physical Sciences", minPercent: 70 }, { subject: "Life Sciences", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Emergency Medical Care and Rescue", aps: 30, duration: "4 years", description: "Paramedics are health care professionals registered with the Professional Board for Emergency Care Practitioners of the Health Professions Council of South Africa. Rapidly provide pre-hospital advanced life support and rescue services to critically ill or injured patients. Includes gaining access to the patient in a wide range of environments, providing emergency care in the field and transporting them to an appropriate medical facility. Paramedics also care for patients undergoing transfer between medical facilities. Programme consists of theoretical and practical components. Does not adhere strictly to normal academic semesters, beginning in early January and continuing outside normal institution terms. Learners typically spend three days a week undertaking theoretical and local private emergency medical service providers. Some work integrated learning includes night shifts. Clinical experience through working in hospitals and clinics in specialized units such as intensive and coronary care, maternity and casualty. Must pass required pre-requisite assessments before entering subjects scheduled for ensuing academic year. Additional entry requirements: medical, physical and environmental fitness evaluations; must obtain driver's licence by end of first year. Jobs: Advanced life support paramedic;

rescue; emergency medical services; private emergency medical service providers; hospitals and clinics.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }, { subject: "Mathematics", minPercent: 70 }, { subject: "Life Sciences AND/OR Physical Sciences", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Environmental Health", aps: 30, duration: "4 years", description: "Environmental Health Practitioners (EHPs) are health professionals with comprehensive knowledge of physical, biological and social sciences. Perform as efficient practitioners in the field of Environmental Health. Advise people and investigate, evaluate and control many facets affecting the environment. Concerned with external environment: air, land, water and noise pollution; full investigation and implementation of intervention measures; urban and regional planning studies; research into environmental hazards. Also involved in internal environment: occupational health, investigation, evaluation and monitoring of industries regarding physical and chemical stresses; asbestos, dusts, heat/cold, stress, noise, chemical hazards, safety measures; high and low pressures. May be exposed to urban and rural communities, required to work independently and make decisions. Work involves control and prevention of infectious diseases (cholera, typhoid, rabies, malaria), Port Health (importation of foodstuffs, quarantine), solving environmental issues, ensuring safe food and water, proper waste disposal, risk assessment and risk management. Additional entry requirements: interview and assessment test. Jobs: Private companies; municipal health departments; state health, parastatals, provincial and national government departments; large food manufacturers; industries; mines; hotel groups; environmental consultancies.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }, { subject: "Mathematics", minPercent: 70 }, { subject: "Physical Sciences", minPercent: 70 }, { subject: "Life Sciences", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Homoeopathy", aps: 30, duration: "4 years (BHSc) + 1 year (MHSc) + 1 year internship", description: "Homoeopathy is a legally recognised profession, increasingly important in South African healthcare provision. A medical approach that resets the wisdom of the body, with emphasis on holistic healthcare. Uses medicines that stimulate the body's own immune and defence systems to initiate the healing process. As a primary-contact practitioner, a homeopath manages all aspects of patient healthcare, including diagnosis, treatment and management, as well as referral and communication with other healthcare professions and institutions. Academic programme extends over five years, providing thorough grounding in traditional medical subjects with special emphasis on diagnostic skills. In final year of BHSc and during MHSc, emphasis on practical application of homeopathic, herbal and naturopathic principles, including preventative medicine, community health care and nutrition. Additional entry requirements: interviews, assignment prior to interview. First preference given to applicants with both Physical Science and Life

Science or Biology. Jobs: Private practitioners; industrial sector; public sector within multi-disciplinary and hospital-related environments.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }, { subject: "Mathematics", minPercent: 70 }, { subject: "Physical Sciences", minPercent: 70 }, { subject: "Life Sciences OR Biology", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Medical Laboratory Science", aps: 35, duration: "4 years", description: "Medical Laboratory Science is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. The service offered is an important component of patient health care; results are a vital tool in the diagnosis, treatment and prevention of disease. Partnership between the programme, National Health Laboratory Service, South African Blood Services, Lancet & Ampath private Laboratories and KwaZulu-Natal Department of Health ensures students fully participate in focused clinical practice activities. Clinical Laboratory Practice in Year 3 and Clinical Laboratory Practice II in final year expose students to new and novel environments. A student must attend formal lectures and practical sessions at DUT in all modules, including a total of six months in 3rd year and 12 months in 4th year placed in training laboratories. Mandatory registration with HPCSA as a student Medical Laboratory Scientist. Specialisation options: Clinical Pathology, Haematology, Medical Microbiology, Clinical Chemistry, Immunohematology, Cytology and Histopathology. Additional entry requirements: knowledge regarding the profession, interviews. Applicants obtaining more than 25 points increase chances of selection. Jobs: Government pathology laboratories; private and research health care laboratories. Two years post-registration experience required to practice independently as a Medical Laboratory Scientist.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 70 }, { subject: "Mathematics", minPercent: 70 }, { subject: "Physical Sciences", minPercent: 70 }, { subject: "Life Sciences", minPercent: 70 }] },

{ name: "Bachelor of Health Sciences in Medical Orthotics and Prosthetics", aps: 30, duration: "4 years", description: "Medical orthotists/prosthetists (MOPs) are concerned with the design, manufacturing and fitting of splints, braces, surgical appliances (orthotics) and artificial limbs (prosthetics). Members of the rehabilitation team helping those who require orthopaedic support. Work independently or in a team alongside doctors, surgeons, physiotherapists, occupational therapists and nursing staff. Role is both clinical and technical: examine patients' disabilities, take measurements, make plaster moulds, custom fit orthotics/prosthetics, make adjustments, instruct patients on use. Expertise developing in response to advances in technology: plastics, carbon fibres, acrylic resin, titanium and silicone enable lighter, more functional and aesthetically pleasing orthotics/prosthetics. Electronics enables electronically functioning prosthetics. Partnership with KwaZulu-Natal Department of Health and private sector. Successful completion entitles registration with HPCSA as an

independent Medical Orthotist and Prosthetist. Additional entry requirements: combination of cognitive and psychomotor abilities determined through interview, placement test and review of voluntary practice report (available from DUT Department of Medical Orthotics and Prosthetics). Top applicants invited to placement test and interview; 30 highest-ranked persons allowed access. Encouraged to complete at least 8 hours voluntary service in a Prosthetic and Orthotic environment, with voluntary practice report submitted with application. Equips students with analytical, conceptual and technical skills in major areas of management, financial management and administrative management. Students gain adequate knowledge to enter a wide variety of fields such as retailing, manufacturing, insurance, banking, logistics and marketing. Offers wider scope for job opportunities than most specialist diplomas. Selection criteria: NSC, SC and NCV applications scored and ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. Jobs: Entrepreneur; administration; banking; wholesale and retail sectors; financial management; government services; government administration; education management; hospital administration; customer service; transportation; property and real estate; supply chain management; insurance.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

{ name: "Diploma in Management Sciences: Business Law", aps: 25, duration: "3 years", description: "Introduces students to main aspects of business law and the compliance function within an organisation. Provides understanding of law relating to business in general and contracts in particular, as well as specific standards, regulations and requirements in terms of relevant legislation and its application. Enables students to analyse and solve problems relating to an organisation's compliance. Equips students with knowledge, skills, attitudes and competencies required at the confluence of legal and business framework. Exposes students to various aspects of law relevant to business and management. In final year, focus on managing purchasing, procurement, contracts management and compliance. Note: This programme does not equip students to practice as an attorney or advocate. Selection criteria: applications scored and ranked from highest to lowest points. Those with highest points may be offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. Jobs: Compliance officers/managers; contract officers/managers; other roles in business requiring legal knowledge.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 60 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 60 }] },

{ name: "Diploma in Management Sciences: Human Resources Management", aps: 25, duration: "3 years", description: "The function of a Human Resources Manager varies according to size and type of company. He/she plans and executes policies relating to all phases of personnel activity. Labour costs represent the single greatest cost in any organization; every effort must be made to make best use of every employee and ensure

optimum productivity through correct selection, training and promotion. Provides specialized service to assist other management team members to make most effective use of human resources. Personal qualities required: self-organised, sensitive to needs of others, ability to communicate and interrelate, integrity, patience, sound human relations, good reasoning abilities, leadership qualities, initiative, decisiveness. Selection criteria: applications scored and ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. Jobs: Personnel Officer; becomes manager after gaining experience; may remain in general personnel field or specialize in specific aspects of personnel management, training or industrial relations.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

{ name: "Diploma in Management Sciences: Marketing", aps: 25, duration: "3 years", description: "Marketing is the business of planning and developing appropriate products or services that satisfy the wants and needs of the market, as well as planning and implementing the marketing programme. Many confuse marketing with selling and advertising; both aspects are included in the marketing function, but account for only part of the total marketing effort. Marketing is responsible for: identifying the people who make up a market; analysing and identifying needs and wants; planning development of appropriate products/services; determining most effective way to price, promote and distribute. Marketing personnel responsible for planning, implementing and evaluating the marketing programme. Attributes essential for success: genuine interest and understanding of people, ability to communicate effectively, aptitude for figures, strong motivation to succeed. Jobs in sales require strong people orientation; creative skills may suit advertising and public relations; flair for figures might prefer marketing strategy, product management or marketing research. Motivation and enthusiasm essential. Selection criteria: applications scored and ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. Jobs: Marketing Manager; Sales Manager; Sales Consultant; Advertising Manager; Researcher.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

{ name: "Diploma in Management Sciences: Operations Management", aps: 25, duration: "3 years", description: "Operations management activities are at the core of all business organisations regardless of industry. Covers areas such as customer service, quality assurance, production planning and control, scheduling, job design, inventory management and many more. About management: all managers need knowledge and skills to effectively plan, organise, lead and control the resources of the organisation.

Within manufacturing sector, greater proportion of workers engaged in production function, including specialist fields such as total quality management, work study, production planning and control, inventory control, project management, operations research. Programme prepares students for specialist fields in production or directly into supervision of workers and thereafter as production/operations managers.

Experiential training compulsory; every effort made to expose students to manufacturing or service organizations. Selection Criteria: applications ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 1 and/or midyear Grade 12 results may be offered conditional place. Preference given to learners from designated groups. Jobs: Trainee production/operations manager; work-study officer; quality controller; customer services; materials manager; production foreman/superintendent; quality consultant.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

{ name: "Diploma in Management Sciences: Public Relations and Communication Management", aps: 25, duration: "3 years", description: "Public Relations is a strategic communication process used to help forge effective two-way communication between an organisation and its various publics. Communication and/or Public Relations Practitioners are responsible for planning and executing programmes to establish and maintain a favourable image for their employer among the public or groups with which it comes into contact. Communication may be face-to-face or through mass media of radio, television, press and Internet. Students equipped with skills such as writing, speaking, research and establishing relationships — important to any job. Public Relations plays crucial management role in various organisations: government, education, non-profit, politics, arts, financial, mining, manufacturing, hospitality. Personal qualities required: broad general interest in world around him/her, able to remain calm under pressure, strong communication skills, honesty, integrity, dedication, passion, creativity, patience, intellectual curiosity, discipline. Selection criteria: applications scored and ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. This programme only considers applicants who ranked this programme as choice 1, 2 or 3. Jobs: Public Relations Practitioner; Media Officer; Events Manager; Communication Officer; Promotions Officer; Strategist; Fund Raiser; Social Media Strategist; Digital Account Manager; Brand Manager; Copywriter; Corporate Communications.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 60 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 50 }] },

{ name: "Diploma in Management Sciences: Retail Management", aps: 25, duration: "3 years", description: "Retail is one of the fastest expanding sectors in the

South African economy, employing one out of every five economically active people. Retailing is the sale of goods and services to the ultimate consumer for personal, family or household use. Scope of retail is broad, career options range from in-store positions to various alternatives in regional and head offices as well as distribution centres. Ideally suited to anyone who wishes to make a career in retailing. Excellent career opportunities available in large corporations. A number of retail partners offer excellent scholarships to good candidates. While different skills required to be successful in retail, people skills often make enormous difference. Candidates should be good communicators, able to tolerate pressure, have high energy levels, enthusiasm, good organisational skills, be trustworthy, efficient and dependable. Cheerful disposition goes a long way; should not be afraid of hard work and long hours. Selection criteria: applications scored and ranked from highest to lowest points. Those with highest points offered firm place; those with Grade 12 June/Trial results may be offered conditional place. Preference given to learners from designated groups. Jobs: Store operations; finance and administration; buying and planning; logistics; human resources; marketing and IT.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

{ name: "Diploma in Public Administration: Disaster and Risk Management", aps: 25, duration: "3 years", description: "Aims to prepare students for careers in the public sector, preparing students for entry into niche areas of different spheres of government and offering guidance on managerial competencies for those preparing to enter higher levels of the public sector. Structured to address management, development and delivery of programmes of reconstruction and development. Designed to offer both practical and theoretical knowledge on a variety of issues ranging from public finance, personnel management, sustainable development, legislative procedures, information technology and knowledge skills applications necessary for public managers, to models of governance. Pre-requisite for advancement to higher levels in the public service. Jobs: Administrative officer; Manager (e.g. Human Resources, Supply chain); Procurement Officer; Disaster & Risk Practitioner (at all levels of government); Local Government Consultant; Divisional Head; Assistant Director.", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }] },

Graduates develop practical farm management and scientific thinking. Best suited to learners who want to farm or work in the agricultural industry. Jobs: Farm Supervisor (R12 000–R40 000/month); Agricultural Technician (R13 000–R45 000/month); Extension Assistant (R12 000–R35 000/month); Agri-input Sales Advisor (R12 000–R50 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "Agricultural Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 40 }] },

{ name: "BSc in Analytical Chemistry", aps: 30, duration: "3 years", description: "Focuses on identifying and measuring substances using spectroscopy, chromatography and electrochemistry, with strong laboratory training in quality control and method validation. Graduates develop precise laboratory technique, instrument operation and data interpretation. Best suited to learners who want careers in testing laboratories, mining, food, environmental and pharmaceutical industries. Jobs:

Analytical Chemist (R20 000–R85 000/month); Lab Analyst (R14 000–R50 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Animal Production", aps: 22, duration: "3 years", description: "Studies livestock production: nutrition, breeding, physiology, health and farm management. Graduates develop animal husbandry and production management. Best suited to learners who enjoy working with animals. Jobs: Livestock Supervisor (R12 000–R42 000/month); Dairy / Feedlot Technician (R13 000–R45 000/month); Animal Production Advisor (R14 000–R48 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "Agricultural Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 40 }] },

{ name: "BSc in Applied Mathematics", aps: 30, duration: "3 years", description: "Uses advanced mathematics to model real-world systems. Typical modules include calculus, linear algebra, differential equations, numerical methods, mathematical modelling, mechanics, optimisation and scientific computing, usually combined with Physics or Computer Science in the second and third year. Graduates develop analytical modelling, numerical simulation, programming for science and the ability to turn messy real-world problems into solvable equations. Best suited to learners who like Mathematics and want to apply it to engineering, physics, finance, climate or data problems. Jobs: Applied Mathematician (R24 000–R90 000/month); Modelling Analyst (R22 000–R85 000/month); Simulation Engineer (R25 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Applied Statistics", aps: 26, duration: "3 years", description: "Teaches how to collect, analyse and interpret data. Modules include descriptive and inferential statistics, probability, regression, experimental design, sampling, time-series analysis and statistical programming in R or Python. Graduates develop data analysis, interpretation of results, clear reporting of findings and use of professional statistical software. Best suited to learners who want a career turning numbers into decisions in health, finance, government, marketing or research. Jobs: Applied Statistician (R22 000–R95 000/month); Survey Analyst (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Astrophysics", aps: 30, duration: "3 years", description: "Studies stars, galaxies, cosmology and observational astronomy using physics, advanced mathematics and computing. South Africa hosts world-class facilities such as SALT and MeerKAT. Graduates develop data analysis, instrumentation and computational

modelling. Best suited to learners passionate about space who are strong in Mathematics and Physics. Jobs: Astronomer / Researcher (R20 000–R85 000/month); Data Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biochemistry", aps: 30, duration: "3 years", description: "Studies the composition, structure and reactions of matter through organic, inorganic, physical and analytical chemistry, with extensive laboratory practicals. Graduates develop laboratory skills, analytical thinking and data interpretation. Best suited to learners who enjoy experiments. Graduates work in industry, mining, environmental testing, pharmaceuticals, research and teaching. Jobs: Biochemist (R18 000–R75 000/month); Medical Laboratory Scientist (after HPCSA route) (R20 000–R70 000/month); Research Biochemist (R20 000–R85 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biological Sciences", aps: 28, duration: "3 years", description: "A flexible biology degree covering cell biology, genetics, ecology, physiology, evolution, plant and animal biology with fieldwork and laboratory practicals. Graduates develop scientific investigation, fieldwork and data analysis. Best suited to learners who love living things and want options in research, conservation, health or education. Jobs: Biologist (R16 000–R65 000/month); Laboratory Technician (R12 000–R40 000/month); Research Assistant (R14 000–R45 000/month); Environmental Officer (R16 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biotechnology", aps: 30, duration: "3 years", description: "Applies living systems to make products and solve problems in health, agriculture, food and the environment. Covers microbiology, genetic engineering, bioprocessing and bioinformatics. Graduates develop laboratory and bioprocess skills, and an understanding of biosafety and regulation. Best suited to learners interested in medicine, farming and industry innovation. Jobs: Biotechnologist (R18 000–R80 000/month); Process Technician (R15 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Financial Mathematics", aps: 34, duration: "3 years", description: "Combines mathematics, statistics and finance to price financial instruments and manage risk. Modules cover stochastic calculus, derivative pricing, portfolio theory, probability, numerical methods and programming. Graduates develop quantitative modelling, risk assessment and programming for financial applications. Best suited to learners who are strong in Mathematics and interested in banking, asset management and quantitative finance. Jobs: Quantitative Analyst (R28 000–R130 000/month); Financial Modeller (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Forensic Science", aps: 26, duration: "3 years", description: "Applies chemistry, biology and physics to criminal investigation, including DNA analysis, toxicology, crime-scene examination and evidence handling. Graduates develop evidence analysis, laboratory accuracy and expert report writing. Best suited to learners who want to work with the police, state laboratories or private forensic services. Jobs: Forensic Analyst (R18 000–R70 000/month); Crime Scene Investigator (R16 000–R55 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Forestry", aps: 26, duration: "3 years", description: "Covers crop and plant science, soil fertility, pest management, plant breeding and sustainable production. Graduates develop practical agronomy, field trial design and resource management. Best suited to learners who want to improve food security and farm productivity. Jobs: Forestry Supervisor (R12 000–R40 000/month); Silviculture Officer (R13 000–R42 000/month); Forest Guard / Technician (R11 000–R35 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "Agricultural Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 40 }] },

{ name: "BSc in Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates

develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Geneticist (R20 000–R90 000/month); Lab Scientist (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Geography", aps: 28, duration: "3 years", description: "Combines physical geography (climate, landforms) with human and economic geography, plus GIS and remote sensing. Graduates develop spatial analysis, GIS mapping and environmental assessment. Best suited to learners interested in planning, the environment and mapping. Jobs: GIS Technician (R14 000–R50 000/month); Geography Teacher (after PGCE) (R18 000–R45 000/month); Spatial Planner Assistant (R15 000–R55 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Geology", aps: 30, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining, exploration or environmental geology. Jobs: Geologist (R22 000–R95 000/month); Exploration Geologist (R25 000–R110 000/month); Mining Geologist (R26 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Human Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Genetic Counsellor pathway (R20 000–R80 000/month); Lab Geneticist (R18 000–R75 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Industrial Chemistry", aps: 30, duration: "3 years", description: "Applies chemistry to manufacturing, covering process chemistry, polymers, petrochemicals, materials and industrial safety and quality. Graduates develop process thinking, laboratory skills and plant-level problem-solving. Best suited to learners who want to work in chemical manufacturing, mining, fuels or water treatment. Jobs:

Industrial Chemist (R18 000–R80 000/month); Process Chemist (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly. Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80 000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Medical Laboratory Science", aps: 26, duration: "4 years", description: "Trains laboratory scientists in pathology: clinical chemistry, haematology, microbiology and immunology. Graduates develop accurate diagnostic testing and quality control. Best suited to learners who prefer lab work to direct patient care. Jobs: Medical Laboratory Scientist (R20 000–R70 000/month); Laboratory Technologist (R18 000–R60 000/month); Pathology Lab Supervisor (R28 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Microbiology", aps: 30, duration: "3 years", description: "Studies bacteria, viruses, fungi and other microbes in health, industry and the environment, covering immunology, virology, biotechnology and laboratory methods. Graduates develop aseptic laboratory technique, diagnostic skills and data interpretation. Best suited to learners interested in disease, food safety, public health and biotechnology. Jobs: Microbiologist (R18 000–R70 000/month); Quality Assurance Officer (R15 000–R55 000/month); Biotech Technician (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Molecular Biology", aps: 26, duration: "3 years", description: "Studies DNA, RNA, proteins and cell processes through genetics, genomics, bioinformatics and advanced laboratory techniques. Graduates develop molecular laboratory skills and data analysis. Best suited to learners curious about how genes and cells work. Jobs: Molecular Biologist (R18 000–R80 000/month); Research Assistant (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Nursing", aps: 28, duration: "4 years", description: "Trains registered nurses in patient care, anatomy, physiology, pharmacology, community health, midwifery and mental health, with extensive clinical placements. Graduates develop clinical care, empathy, decision-making and teamwork. Best suited to caring learners wanting a stable, in-demand career. Registration with the SANC is required. Jobs: Professional Nurse (R18 000–R67 000/month); Clinic Nurse (R16 000–R56 000/month); Nurse Manager (R28 000–R88 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }] },

{ name: "Bachelor of Pharmacy", aps: 30, duration: "4 years", description: "Teaches how medicines are discovered, formulated, dispensed and used safely, including pharmacology, pharmaceuticals, pharmacy practice and law, with practical training in pharmacies. Graduates develop medicine knowledge, patient counselling and

accuracy. Best suited to learners with strong Maths, Physical Sciences and Life Sciences. Graduates complete an internship and community service. Jobs: Pharmacist (R25 000–R90 000/month); Clinical Pharmacist (R28 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

Jobs: Environmental Officer (R16 000–R55 000/month); Environmental Consultant (R18 000–R70 000/month); Sustainability Coordinator (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Financial Mathematics", aps: 34, duration: "3 years", description: "Combines mathematics, statistics and finance to price financial instruments and manage risk. Modules cover stochastic calculus, derivative pricing, portfolio theory, probability, numerical methods and programming. Graduates develop quantitative modelling, risk assessment and programming for financial applications. Best suited to learners who are strong in Mathematics and interested in banking, asset management and quantitative finance. Jobs: Quantitative Analyst (R28 000–R130 000/month); Financial Modeller (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Forensic Science", aps: 26, duration: "3 years", description: "Applies chemistry, biology and physics to criminal investigation, including DNA analysis, toxicology, crime-scene examination and evidence handling. Graduates develop evidence analysis, laboratory accuracy and expert report writing. Best suited to learners who want to work with the police, state laboratories or private forensic services. Jobs: Forensic Analyst (R18 000–R70 000/month); Crime Scene Investigator (R16 000–R55 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Forestry", aps: 26, duration: "3 years", description: "Covers crop and plant science, soil fertility, pest management, plant breeding and sustainable production. Graduates develop practical agronomy, field trial design and resource management. Best suited to learners who want to improve food security and farm productivity. Jobs: Forestry Supervisor (R12 000–R40 000/month); Silviculture Officer (R13 000–R42 000/month); Forest Guard / Technician (R11 000–R35 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, {

subject: "Agricultural Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 40 }] }],

{ name: "BSc in Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Geneticist (R20 000–R90 000/month); Lab Scientist (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Geography", aps: 28, duration: "3 years", description: "Combines physical geography (climate, landforms) with human and economic geography, plus GIS and remote sensing. Graduates develop spatial analysis, GIS mapping and environmental assessment. Best suited to learners interested in planning, the environment and mapping. Jobs: GIS Technician (R14 000–R50 000/month); Geography Teacher (after PGCE) (R18 000–R45 000/month); Spatial Planner Assistant (R15 000–R55 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Geology", aps: 30, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining, exploration or environmental geology. Jobs: Geologist (R22 000–R95 000/month); Exploration Geologist (R25 000–R110 000/month); Mining Geologist (R26 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Human Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Genetic Counsellor pathway (R20 000–R80 000/month); Lab Geneticist (R18 000–R75 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Industrial Chemistry", aps: 30, duration: "3 years", description: "Applies chemistry to manufacturing, covering process chemistry, polymers, petrochemicals, materials and industrial safety and quality. Graduates develop process thinking, laboratory skills and plant-level problem-solving. Best suited to learners who want to work in chemical manufacturing, mining, fuels or water treatment. Jobs: Industrial Chemist (R18 000–R80 000/month); Process Chemist (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly. Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80

000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Medical Laboratory Science", aps: 26, duration: "4 years", description: "Trains laboratory scientists in pathology: clinical chemistry, haematology, microbiology and immunology. Graduates develop accurate diagnostic testing and quality control. Best suited to learners who prefer lab work to direct patient care. Jobs: Medical Laboratory Scientist (R20 000–R70 000/month); Laboratory Technologist (R18 000–R60 000/month); Pathology Lab Supervisor (R28 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Microbiology", aps: 30, duration: "3 years", description: "Studies bacteria, viruses, fungi and other microbes in health, industry and the environment, covering immunology, virology, biotechnology and laboratory methods. Graduates develop aseptic laboratory technique, diagnostic skills and data interpretation. Best suited to learners interested in disease, food safety, public health and biotechnology. Jobs: Microbiologist (R18 000–R70 000/month); Quality Assurance Officer (R15 000–R55 000/month); Biotech Technician (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Molecular Biology", aps: 26, duration: "3 years", description: "Studies DNA, RNA, proteins and cell processes through genetics, genomics, bioinformatics and advanced laboratory techniques. Graduates develop molecular laboratory skills and data analysis. Best suited to learners curious about how genes and cells work. Jobs: Molecular Biologist (R18 000–R80 000/month); Research Assistant (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Nursing", aps: 28, duration: "4 years", description: "Trains registered nurses in patient care, anatomy, physiology, pharmacology, community health, midwifery and mental health, with extensive clinical placements. Graduates develop clinical care, empathy, decision-making and teamwork. Best suited to caring learners wanting a stable, in-demand career. Registration with the SANC is required. Jobs: Professional Nurse (R18 000–R67 000/month); Clinic Nurse (R16 000–R56 000/month); Nurse Manager (R28 000–R88 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }] },

{ name: "Bachelor of Pharmacy", aps: 30, duration: "4 years", description: "Teaches how medicines are discovered, formulated, dispensed and used safely, including pharmacology, pharmaceuticals, pharmacy practice and law, with practical training in pharmacies. Graduates develop medicine knowledge, patient counselling and accuracy. Best suited to learners with strong Maths, Physical Sciences and Life Sciences. Graduates complete an internship and community service. Jobs: Pharmacist (R25 000–R90 000/month); Clinical Pharmacist (R28 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Physics", aps: 30, duration: "3 years", description: "Explores matter, energy, motion and the universe. Modules include mechanics, electromagnetism, quantum physics, thermodynamics, optics and mathematical physics, with laboratory and computational work. Graduates develop experimental technique, mathematical modelling and quantitative problem-solving. Best suited to learners who ask how things work. Graduates go into engineering, energy, medical physics, data analysis, research and teaching. Jobs: Physicist (R22 000–R90 000/month); Laboratory Scientist (R18 000–R70 000/month); Radiation Protection Officer (R20 000–R80 000/month); Physics Teacher (after PGCE) (R18 000–R45 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Plant Production", aps: 22, duration: "3 years", description: "Covers crop and plant science, soil fertility, pest management, plant breeding and sustainable production. Graduates develop practical agronomy, field trial design and resource management. Best suited to learners who want to improve food security and farm productivity. Jobs: Crop Production Supervisor (R12 000–R42 000/month); Irrigation Technician (R12 000–R40 000/month); Plant Production Advisor (R14 000–R48 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "Agricultural Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 40 }] },

{ name: "BSc in Actuarial Science", aps: 36, duration: "3 years", description: "One of the most demanding quantitative degrees. You study probability, statistics, financial mathematics, economics, life and short-term insurance, investment and risk, with accreditation exemptions from professional actuarial exams. Graduates develop advanced probability and statistical modelling, financial valuation, and professional judgement under uncertainty. Best suited to learners with excellent Mathematics results who want a well-paid career in insurance, pensions, banking or consulting. Chartered actuaries are in short supply in South Africa. Jobs: Actuarial Analyst (R25 000–R90 000/month); Risk Analyst (R22 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 70 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Analytical Chemistry", aps: 30, duration: "3 years", description: "Focuses on identifying and measuring substances using spectroscopy, chromatography and electrochemistry, with strong laboratory training in quality control and method validation. Graduates develop precise laboratory technique, instrument operation and data interpretation. Best suited to learners who want careers in testing laboratories, mining, food, environmental and pharmaceutical industries. Jobs: Analytical Chemist (R20 000–R85 000/month); Lab Analyst (R14 000–R50 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Applied Mathematics", aps: 30, duration: "3 years", description: "Uses advanced mathematics to model real-world systems. Typical modules include calculus, linear algebra, differential equations, numerical methods, mathematical modelling, mechanics, optimisation and scientific computing, usually combined with Physics or Computer Science in the second and third year. Graduates develop analytical modelling, numerical simulation, programming for science and the ability to turn messy real-world problems into solvable equations. Best suited to learners who like Mathematics and want to apply it to engineering, physics, finance, climate or data problems. Jobs: Applied Mathematician (R24 000–R90 000/month); Modelling Analyst (R22 000–R85 000/month); Simulation Engineer (R25 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Applied Statistics", aps: 26, duration: "3 years", description: "Teaches how to collect, analyse and interpret data. Modules include descriptive and inferential statistics, probability, regression, experimental design, sampling, time-series analysis and statistical programming in R or Python. Graduates develop data analysis, interpretation of results, clear reporting of findings and use of professional statistical software. Best suited to learners who want a career turning numbers into decisions in health, finance, government, marketing or research. Jobs: Applied Statistician (R22 000–R95 000/month); Survey Analyst (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Artificial Intelligence", aps: 34, duration: "3 years", description: "Focuses on machine learning, deep learning, natural language processing, computer vision, robotics and knowledge representation, built on programming, algorithms, linear algebra and probability. Graduates develop designing and training intelligent systems, working with large datasets and thinking critically about AI ethics. Best suited to learners who want to build the next generation of intelligent software. Jobs: AI Developer (R28 000–R140 000/month); ML Engineer (R30 000–R150 000/month).", requirements: [{

subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Astrophysics", aps: 30, duration: "3 years", description: "Studies stars, galaxies, cosmology and observational astronomy using physics, advanced mathematics and computing. South Africa hosts world-class facilities such as SALT and MeerKAT. Graduates develop data analysis, instrumentation and computational modelling. Best suited to learners passionate about space who are strong in Mathematics and Physics. Jobs: Astronomer / Researcher (R20 000–R85 000/month); Data Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biochemistry", aps: 30, duration: "3 years", description: "Studies the composition, structure and reactions of matter through organic, inorganic, physical and analytical chemistry, with extensive laboratory practicals. Graduates develop laboratory skills, analytical thinking and data interpretation. Best suited to learners who enjoy experiments. Graduates work in industry, mining, environmental testing, pharmaceuticals, research and teaching. Jobs: Biochemist (R18 000–R75 000/month); Medical Laboratory Scientist (after HPCSA route) (R20 000–R70 000/month); Research Biochemist (R20 000–R85 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biological Sciences", aps: 28, duration: "3 years", description: "A flexible biology degree covering cell biology, genetics, ecology, physiology, evolution, plant and animal biology with fieldwork and laboratory practicals. Graduates develop scientific investigation, fieldwork and data analysis. Best suited to learners who love living things and want options in research, conservation, health or education. Jobs: Biologist (R16 000–R65 000/month); Laboratory Technician (R12 000–R40 000/month); Research Assistant (R14 000–R45 000/month); Environmental Officer (R16 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biotechnology", aps: 30, duration: "3 years", description: "Applies living systems to make products and solve problems in health, agriculture, food and the environment. Covers microbiology, genetic engineering, bioprocessing and bioinformatics. Graduates develop laboratory and bioprocess skills, and an understanding of biosafety and regulation. Best suited to learners interested in medicine, farming and industry innovation. Jobs: Biotechnologist (R18 000–R80 000/month); Process Technician (R15 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Chemistry", aps: 30, duration: "3 years", description: "Studies the composition, structure and reactions of matter through organic, inorganic, physical and analytical chemistry, with extensive laboratory practicals. Graduates develop laboratory skills, analytical thinking and data interpretation. Best suited to learners who enjoy experiments. Graduates work in industry, mining, environmental testing, pharmaceuticals, research and teaching. { name: "BSc in Computational Science", aps: 26, duration: "3 years", description: "Blends applied mathematics with high-performance computing. You learn numerical analysis, modelling, simulation, algorithms and scientific programming used in engineering, physics, climate science and data analysis. Graduates develop computational modelling, programming and numerical problem-solving. Best suited to learners who enjoy both Mathematics and coding and want to solve large-scale scientific problems. Jobs: Computational Scientist (R22 000–R95 000/month); Simulation Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computer Science", aps: 32, duration: "3 years", description: "Covers programming (Python, Java, C++), data structures and algorithms, databases, operating systems, computer networks, software engineering and the theory of computation. Most programmes add electives such as artificial intelligence, machine learning, computer graphics, cloud computing and cybersecurity, plus a major software project in the final year. Mathematics (discrete maths, calculus, linear algebra, statistics) runs alongside as the foundation. Graduates develop problem decomposition, clean and efficient coding, system design, teamwork on large software projects and the mathematical reasoning that underpins modern computing. Best suited to learners who enjoy logic puzzles and building things with code, and who are comfortable with Mathematics. Graduates work across banking, telecoms, start-ups, government and the fast-growing global remote tech market, or continue to a Hons/Master's in AI and data science. Jobs: Software Developer (R22 000–R95 000/month); Systems Analyst (R20 000–R80 000/month); IT Consultant (R25 000–R110 000/month); Web Developer (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Conservation Biology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Conservation Officer (R14 000–R55 000/month); Wildlife Manager (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Cybersecurity", aps: 32, duration: "3 years", description: "Covers network and systems security, cryptography, ethical hacking, digital forensics, secure software development, risk management and information-security law. Graduates develop threat analysis, penetration testing, incident response and secure system design. Best suited to learners who enjoy technology and want to defend organisations against cyber attacks. Demand for skilled security professionals far exceeds supply. Jobs: Cybersecurity Analyst (R22 000–R100 000/month); Security Consultant (R25 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Data Science", aps: 34, duration: "3 years", description: "Combines statistics, programming and machine learning to extract insight from large datasets. You study data wrangling, databases, statistical modelling, machine learning, data visualisation, big-data tools and ethics, usually with a capstone project on real data. Graduates develop Python/R programming, predictive modelling, data storytelling and cloud/data-engineering basics. Best suited to learners who enjoy Mathematics and coding and want one of the fastest-growing careers in banking, retail, health, telecoms and tech. Jobs: Data Scientist (R28 000–R120 000/month); Machine Learning Engineer (junior) (R30 000–R130 000/month); Business Intelligence Analyst (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Dietetics", aps: 30, duration: "4 years", description: "Studies human nutrition and its role in preventing and treating disease, with clinical nutrition, food-service management and community nutrition. Graduates develop nutritional assessment and counselling. Best suited to learners who care about food and health. Jobs: Dietitian (R18 000–R65 000/month); Clinical Dietitian (R20 000–R70 000/month); Food Service Manager (R16 000–R55 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Earth Sciences", aps: 26, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and

exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining, exploration or environmental geology. Jobs: Earth Scientist (R18 000–R80 000/month); Geoscientist (R20 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Ecology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Ecologist (R16 000–R65 000/month); Conservation Scientist (R16 000–R60 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Electronics", aps: 26, duration: "3 years", description: "Covers analogue and digital electronics, circuits, microcontrollers, instrumentation and embedded systems, with strong hands-on practicals. Graduates develop circuit design, prototyping and troubleshooting. Best suited to learners who enjoy building and repairing electronic devices. Jobs: Electronics Technician (R14 000–R55 000/month); Electronics Engineer pathway (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Emergency Medical Care", aps: 28, duration: "4 years", description: "Prepares paramedics for pre-hospital emergency care: trauma, resuscitation, advanced life support, ambulance operations and disaster response. Graduates develop rapid assessment, advanced life support and calm decision-making. Best suited to learners who thrive under pressure and want to save lives. Jobs: Emergency Care Practitioner (R20 000–R70 000/month); Paramedic (R18 000–R65 000/month); EMS Shift Leader (R25 000–R80 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Environmental Health", aps: 26, duration: "4 years", description: "Prepares environmental health practitioners to protect public health through inspections of food, water, waste and air quality. Graduates develop inspection, risk assessment and public-health law knowledge. Best suited to learners who want to protect communities, often employed by municipalities. Jobs: Environmental Health Practitioner (R18 000–R55 000/month); Occupational Hygiene Officer (R18 000–R60

000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }] },

{ name: "BSc in Environmental Management", aps: 26, duration: "3 years", description: "Examines how people interact with the environment: ecology, pollution, climate change, environmental law, impact assessment and sustainable resource management. Graduates develop environmental assessment, GIS and policy analysis. Best suited to learners who want to tackle climate, water and sustainability challenges. Jobs: Environmental Manager (R18 000–R75 000/month); EIA Consultant (R18 000–R80 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Environmental Science", aps: 28, duration: "3 years", description: "Examines how people interact with the environment: ecology, pollution, climate change, environmental law, impact assessment and sustainable resource management. Graduates develop environmental assessment, GIS and policy analysis. Best suited to learners who want to tackle climate, water and sustainability challenges. Jobs: Environmental Officer (R16 000–R55 000/month); Environmental Consultant (R18 000–R70 000/month); Sustainability Coordinator (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Financial Mathematics", aps: 34, duration: "3 years", description: "Combines mathematics, statistics and finance to price financial instruments and manage risk. Modules cover stochastic calculus, derivative pricing, portfolio theory, probability, numerical methods and programming. Graduates develop quantitative modelling, risk assessment and programming for financial applications. Best suited to learners who are strong in Mathematics and interested in banking, asset management and quantitative finance. Jobs: Quantitative Analyst (R28 000–R130 000/month); Financial Modeller (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Forensic Science", aps: 26, duration: "3 years", description: "Applies chemistry, biology and physics to criminal investigation, including DNA analysis, toxicology, crime-scene examination and evidence handling. Graduates develop evidence analysis, laboratory accuracy and expert report writing. Best suited to learners who want to work with the police, state laboratories or private forensic services. Jobs: Forensic Analyst (R18 000–R70 000/month); Crime Scene Investigator (R16 000–R55 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, {

subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Geneticist (R20 000–R90 000/month); Lab Scientist (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Geography", aps: 28, duration: "3 years", description: "Combines physical geography (climate, landforms) with human and economic geography, plus GIS and remote sensing. Graduates develop spatial analysis, GIS mapping and environmental assessment. Best suited to learners interested in planning, the environment and mapping. Jobs: GIS Technician (R14 000–R50 000/month); Geography Teacher (after PGCE) (R18 000–R45 000/month); Spatial Planner Assistant (R15 000–R55 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Geology", aps: 30, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining, exploration or environmental geology. Jobs: Geologist (R22 000–R95 000/month); Exploration Geologist (R25 000–R110 000/month); Mining Geologist (R26 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Human Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Genetic Counsellor pathway (R20 000–R80 000/month); Lab Geneticist (R18 000–R75 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Industrial Chemistry", aps: 30, duration: "3 years", description: "Applies chemistry to manufacturing, covering process chemistry, polymers, petrochemicals, materials and industrial safety and quality. Graduates develop process thinking, laboratory skills and plant-level problem-solving. Best suited to learners who want to work in chemical manufacturing, mining, fuels or water treatment. Jobs: Industrial Chemist (R18 000–R80 000/month); Process Chemist (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Systems Management", aps: 30, duration: "3 years", description: "Links technology with business. You learn systems analysis and design, databases, programming, business process management, enterprise systems, IT governance and project management alongside core commerce modules. Graduates develop bridging IT and business needs, analysing processes and managing technology projects. Best suited to learners who like both business and technology and want to work as analysts, consultants or IT managers. Jobs: IT Manager pathway (R25 000–R100 000/month); Systems Coordinator (R16 000–R60 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Higher Certificate in Information Technology", aps: 18, duration: "1 year", description: "A one-year entry-level programme in computer literacy, programming basics, networks, databases and web design. Successful students can articulate into a Diploma in IT. Graduates develop practical IT skills, basic coding and user support. Best suited to learners who want a gentle, practical start in IT or who need a pathway to a diploma. Jobs: IT Support Assistant (R10 000–R28 000/month); Junior Computer Technician (R11 000–R30 000/month); Helpdesk Agent (R10 000–R25 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Technology", aps: 26, duration: "3 years", description: "Prepares you to develop, deploy and manage computer systems. You study programming, databases, web and mobile development, networks, systems analysis, information security and project management. Graduates develop software development, systems administration and practical problem-solving with technology. Best suited to learners who want a career building and supporting business systems. Jobs: IT Support Specialist (R14 000–R45 000/month); Network Administrator (R16 000–R60 000/month); Systems Administrator (R18 000–R70 000/month); Junior Cybersecurity Analyst (R18 000–R65 000/month).", requirements: [{ subject:

"Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly. Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80 000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Medical Laboratory Science", aps: 26, duration: "4 years", description: "Trains laboratory scientists in pathology: clinical chemistry, haematology, microbiology and immunology. Graduates develop accurate diagnostic testing and

quality control. Best suited to learners who prefer lab work to direct patient care. Jobs: Medical Laboratory Scientist (R20 000–R70 000/month); Laboratory Technologist (R18 000–R60 000/month); Pathology Lab Supervisor (R28 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

Typical modules include screenwriting, directing, cinematography, editing, sound design and media theory. Graduates develop storytelling, research and production skills. Best suited to creative, curious learners who enjoy communicating. Jobs: Video Producer (R12 000–R55 000/month); Content Creator (R12 000–R55 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Heritage and Cultural Tourism", aps: 26, duration: "3 years", description: "Covers tourism operations, hospitality management, destination marketing and sustainable tourism. Typical modules include heritage management,

museum studies, cultural tourism and conservation. Graduates develop service excellence and event and operations management. Best suited to learners who love travel and hospitality. Jobs: Heritage Officer (R12 000–R45 000/month); Tourism Guide Coordinator (R11 000–R40 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in History", aps: 26, duration: "3 years", description: "Examines societies, cultures and the past through research and critical analysis. Typical modules include African, South African and world history, historiography and research methods. Graduates develop research, analysis and persuasive writing. Best suited to curious learners interested in people and society. Jobs: Researcher (R14 000–R55 000/month); Museum Officer (R12 000–R42 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in International Studies", aps: 26, duration: "3 years", description: "Studies governance, power, international relations, development and social problems. Typical modules include global politics, diplomacy, international law, regional integration (AU and SADC) and foreign policy. Graduates develop policy analysis, research and argumentation. Best suited to learners interested in government, NGOs and public affairs. Jobs: Diplomatic Trainee (R20 000–R70 000/month); Policy Analyst (R16 000–R65 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Journalism", aps: 28, duration: "3 years", description: "Teaches reporting, writing, media production and communication theory, with practical newsroom, studio or stage experience. Typical modules include news reporting, feature writing, media law and ethics, and broadcast and multimedia journalism. Graduates develop storytelling, research and production skills. Best suited to creative, curious learners who enjoy communicating. Jobs: Journalist (R12 000–R50 000/month); Content Creator (R12 000–R55 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Linguistics", aps: 26, duration: "3 years", description: "Studies language and literature, including writing, analysis, translation and language in society. Typical modules include phonetics, syntax, semantics, sociolinguistics and language acquisition. Graduates develop critical reading, writing and communication. Best suited to learners who love language. Jobs: Language Practitioner (R14 000–R55 000/month); Lexicographer (R14 000–R50 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Policing", aps: 22, duration: "3 years", description: "Develops skills in law enforcement, crime prevention, traffic and municipal policing, and security risk management. Graduates develop operational readiness and legal compliance. Best

suitable to learners who want to work in policing and security. Jobs: Police Officer (SAPS) (R15 000–R45 000/month); Detective / Investigator (R18 000–R55 000/month); Police Sergeant / Supervisor (R22 000–R65 000/month); Metro Police Officer (R14 000–R40 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Political Science", aps: 26, duration: "3 years", description: "Studies governance, power, international relations, development and social problems. Typical modules include political theory, comparative politics, international relations, South African politics and public policy. Graduates develop policy analysis, research and argumentation. Best suited to learners interested in government, NGOs and public affairs. Jobs: Political Analyst (R16 000–R65 000/month); Parliamentary Researcher (R18 000–R60 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Psychology", aps: 28, duration: "3 years", description: "Studies human behaviour and the mind: developmental, social, abnormal and research psychology. Professional registration requires postgraduate study. Typical modules include developmental, social, abnormal and personality psychology, research methods and statistics. Graduates develop critical thinking, research methods and empathy. Best suited to learners interested in people and mental health. Jobs: Psychology Assistant (R12 000–R38 000/month); HR Development Officer (R14 000–R55 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Road Traffic and Municipal Police Management", aps: 22, duration: "3 years", description: "Teaches the fundamentals of running organisations: management, entrepreneurship, finance, marketing, operations and strategy. Graduates develop leadership, planning and business problem-solving. Best suited to learners interested in management or starting a business. Jobs: Traffic Officer (R14 000–R38 000/month); Metro Police Officer (R15 000–R42 000/month); Road Safety Officer (R14 000–R40 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Diploma in Security Management", aps: 22, duration: "3 years", description: "Teaches the fundamentals of running organisations: management, entrepreneurship, finance, marketing, operations and strategy. Graduates develop leadership, planning and business problem-solving. Best suited to learners interested in management or starting a business. Jobs: Security Manager (R16 000–R50 000/month); Risk Control Officer (R15 000–R45 000/month); Close Protection / Security Supervisor (R14 000–R48 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Social Science", aps: 26, duration: "3 years", description: "A broad social-science degree covering sociology, politics and research methods. Typical modules include research methods, language and society, politics and social theory. Graduates develop analysis and research. Best suited to learners curious about society. Jobs: Social Researcher (R14 000–R55 000/month); Policy Assistant (R14 000–R50 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Social Work", aps: 28, duration: "4 years", description: "Prepares you for professional social work with individuals, families and communities through human behaviour, social policy and supervised fieldwork. Registration with the SACSSP is required. Graduates develop counselling, advocacy and community intervention. Best suited to learners who want to make a difference in vulnerable communities. Jobs: Social Worker (R18 000–R58 000/month); Case Manager (R18 000–R60 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Sociology", aps: 26, duration: "3 years", description: "Examines societies, cultures and the past through research and critical analysis. Typical modules include social theory, research methods, inequality, race and gender, and urban and rural society. Graduates develop research, analysis and persuasive writing. Best suited to curious learners interested in people and society. Jobs: Social Researcher (R14 000–R55 000/month); Community Officer (R14 000–R48 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BA in Visual Arts", aps: 26, duration: "3 years", description: "Studio-based training in drawing, design, digital media and art history. Typical modules include drawing, painting, printmaking, photography, digital media and art history. Graduates develop creative practice and visual communication. Best suited to creative learners with a strong portfolio. Jobs: Artist (variable); Gallery Assistant (R10 000–R35 000/month).", requirements: [{ subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }

You learn numerical analysis, modelling, simulation, algorithms and scientific programming used in engineering, physics, climate science and data analysis. Graduates develop computational modelling, programming and numerical problem-solving. Best suited to learners who enjoy both Mathematics and coding and want to solve large-scale scientific problems. Jobs: Computational Scientist (R22 000–R95 000/month); Simulation Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computer Science", aps: 32, duration: "3 years", description: "Covers programming (Python, Java, C++), data structures and algorithms, databases, operating systems, computer networks, software engineering and the theory of computation. Most programmes add electives such as artificial intelligence, machine learning, computer graphics, cloud computing and cybersecurity, plus a major software project in the final year. Mathematics (discrete maths, calculus, linear algebra, statistics) runs alongside as the foundation. Graduates develop problem decomposition, clean and efficient coding, system design, teamwork on large software projects and the mathematical reasoning that underpins modern computing. Best suited to learners who enjoy logic puzzles and building things with code, and who are comfortable with Mathematics. Graduates work across banking, telecoms, start-ups, government and the fast-growing global remote tech market, or continue to a Hons/Master's in AI and data science. Jobs: Software Developer (R22 000–R95 000/month); Systems Analyst (R20 000–R80 000/month); IT Consultant (R25 000–R110 000/month); Web Developer (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Conservation Biology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Conservation Officer (R14 000–R55 000/month); Wildlife Manager (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Cybersecurity", aps: 32, duration: "3 years", description: "Covers network and systems security, cryptography, ethical hacking, digital forensics, secure software development, risk management and information-security law. Graduates develop threat analysis, penetration testing, incident response and secure system design. Best suited to learners who enjoy technology and want to defend organisations against cyber attacks. Demand for skilled security professionals far exceeds supply. Jobs: Cybersecurity Analyst (R22 000–R100 000/month); Security Consultant (R25 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Data Science", aps: 34, duration: "3 years", description: "Combines statistics, programming and machine learning to extract insight from large datasets. You study data wrangling, databases, statistical modelling, machine learning, data visualisation, big-data tools and ethics, usually with a capstone project on real data. Graduates develop Python/R programming, predictive modelling, data storytelling and cloud/data-engineering basics. Best suited to learners who enjoy Mathematics and coding and want one of the fastest-growing careers in banking, retail, health, telecoms and tech. Jobs: Data Scientist (R28 000–R120 000/month); Machine Learning Engineer (junior) (R30 000–R130 000/month); Business Intelligence Analyst (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Industrial Chemistry", aps: 30, duration: "3 years", description: "Applies chemistry to manufacturing, covering process chemistry, polymers, petrochemicals, materials and industrial safety and quality. Graduates develop process thinking, laboratory skills and plant-level problem-solving. Best suited to learners who want to work in chemical manufacturing, mining, fuels or water treatment. Jobs: Industrial Chemist (R18 000–R80 000/month); Process Chemist (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Systems Management", aps: 30, duration: "3 years", description: "Links technology with business. You learn systems analysis and design, databases, programming, business process management, enterprise systems, IT governance and project management alongside core commerce modules. Graduates develop bridging IT and business needs, analysing processes and managing technology projects. Best suited to learners who like both business and technology and want to work as analysts, consultants or IT managers. Jobs: IT Manager pathway (R25 000–R100 000/month); Systems Coordinator (R16 000–R60 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Higher Certificate in Information Technology", aps: 18, duration: "1 year", description: "A one-year entry-level programme in computer literacy, programming basics, networks, databases and web design. Successful students can articulate into a Diploma in IT. Graduates develop practical IT skills, basic coding and user support. Best suited to learners who want a gentle, practical start in IT or who need a pathway to a diploma. Jobs: IT Support Assistant (R10 000–R28 000/month); Junior Computer Technician (R11 000–R30 000/month); Helpdesk Agent (R10 000–R25 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Technology", aps: 26, duration: "3 years", description: "Prepares you to develop, deploy and manage computer systems. You study programming, databases, web and mobile development, networks, systems analysis, information security and project management. Graduates develop software development, systems administration and practical problem-solving with technology. Best suited to learners who want a career building and supporting business systems. Jobs: IT Support Specialist (R14 000–R45 000/month); Network Administrator (R16 000–R60 000/month); Systems Administrator (R18 000–R70 000/month); Junior Cybersecurity Analyst (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical

Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]] },

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]] },

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly. Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80 000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]] },

{ name: "BSc in Actuarial Science", aps: 36, duration: "3 years", description: "One of the most demanding quantitative degrees. You study probability, statistics, financial mathematics, economics, life and short-term insurance, investment and risk, with accreditation exemptions from professional actuarial exams. Graduates develop advanced probability and statistical modelling, financial valuation, and professional judgement under uncertainty. Best suited to learners with excellent Mathematics results who want a well-paid career in insurance, pensions, banking or consulting. Chartered actuaries are in short supply in South Africa. Jobs: Actuarial Analyst (R25 000–R90 000/month); Risk Analyst (R22 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 70 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Agriculture", aps: 26, duration: "3 years", description: "A broad agricultural degree combining crop and animal production, soil science, economics and farm management. Graduates develop practical farm management and scientific thinking. Best suited to learners who want to farm or work in the agricultural industry.

Jobs: Agricultural Advisor (R16 000–R60 000/month); Farm Manager (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Analytical Chemistry", aps: 30, duration: "3 years", description: "Focuses on identifying and measuring substances using spectroscopy, chromatography and electrochemistry, with strong laboratory training in quality control and method validation. Graduates develop precise laboratory technique, instrument operation and data interpretation. Best suited to learners who want careers in testing laboratories, mining, food, environmental and pharmaceutical industries. Jobs: Analytical Chemist (R20 000–R85 000/month); Lab Analyst (R14 000–R50 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Applied Mathematics", aps: 30, duration: "3 years", description: "Uses advanced mathematics to model real-world systems. Typical modules include calculus, linear algebra, differential equations, numerical methods, mathematical modelling, mechanics, optimisation and scientific computing, usually combined with Physics or Computer Science in the second and third year. Graduates develop analytical modelling, numerical simulation, programming for science and the ability to turn messy real-world problems into solvable equations. Best suited to learners who like Mathematics and want to apply it to engineering, physics, finance, climate or data problems. Jobs: Applied Mathematician (R24 000–R90 000/month); Modelling Analyst (R22 000–R85 000/month); Simulation Engineer (R25 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Applied Statistics", aps: 26, duration: "3 years", description: "Teaches how to collect, analyse and interpret data. Modules include descriptive and inferential statistics, probability, regression, experimental design, sampling, time-series analysis and statistical programming in R or Python. Graduates develop data analysis, interpretation of results, clear reporting of findings and use of professional statistical software. Best suited to learners who want a career turning numbers into decisions in health, finance, government, marketing or research. Jobs: Applied Statistician (R22 000–R95 000/month); Survey Analyst (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Artificial Intelligence", aps: 34, duration: "3 years", description: "Focuses on machine learning, deep learning, natural language processing, computer vision, robotics and knowledge representation, built on programming, algorithms, linear

algebra and probability. Graduates develop designing and training intelligent systems, working with large datasets and thinking critically about AI ethics. Best suited to learners who want to build the next generation of intelligent software. Jobs: AI Developer (R28 000–R140 000/month); ML Engineer (R30 000–R150 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Astrophysics", aps: 30, duration: "3 years", description: "Studies stars, galaxies, cosmology and observational astronomy using physics, advanced mathematics and computing. South Africa hosts world-class facilities such as SALT and MeerKAT. Graduates develop data analysis, instrumentation and computational modelling. Best suited to learners passionate about space who are strong in Mathematics and Physics. Jobs: Astronomer / Researcher (R20 000–R85 000/month); Data Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biochemistry", aps: 30, duration: "3 years", description: "Studies the composition, structure and reactions of matter through organic, inorganic, physical and analytical chemistry, with extensive laboratory practicals. Graduates develop laboratory skills, analytical thinking and data interpretation. Best suited to learners who enjoy experiments. Graduates work in industry, mining, environmental testing, pharmaceuticals, research and teaching. Jobs: Biochemist (R18 000–R75 000/month); Medical Laboratory Scientist (after HPCSA route) (R20 000–R70 000/month); Research Biochemist (R20 000–R85 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biological Sciences", aps: 28, duration: "3 years", description: "A flexible biology degree covering cell biology, genetics, ecology, physiology, evolution, plant and animal biology with fieldwork and laboratory practicals. Graduates develop scientific investigation, fieldwork and data analysis. Best suited to learners who love living things and want options in research, conservation, health or education. Jobs: Biologist (R16 000–R65 000/month); Laboratory Technician (R12 000–R40 000/month); Research Assistant (R14 000–R45 000/month); Environmental Officer (R16 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Biotechnology", aps: 30, duration: "3 years", description: "Applies living systems to make products and solve problems in health, agriculture, food and the environment. Covers microbiology, genetic engineering, bioprocessing and bioinformatics. Graduates develop laboratory and bioprocess skills, and an understanding of biosafety and regulation. Best suited to learners interested in

medicine, farming and industry innovation. Jobs: Biotechnologist (R18 000–R80 000/month); Process Technician (R15 000–R55 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BEng in Chemical Engineering", aps: 35, duration: "4 years", description: "Applies chemistry, physics and mathematics to design processes that make fuels, chemicals, food, medicines and treated water on an industrial scale. Graduates develop process design, safety and optimisation of plants. Best suited to learners strong in Maths and Physical Sciences interested in petrochemicals, mining and manufacturing. Jobs: Chemical Engineer (R28 000–R115 000/month); Process Engineer (R26 000–R110 000/month); Production Engineer (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]]},

{ name: "BEng in Civil Engineering", aps: 35, duration: "4 years", description: "Teaches the design, construction and maintenance of infrastructure such as roads, bridges, dams, buildings and water systems. Modules include structural analysis, geotechnics, hydraulics, transport engineering and construction management. Graduates develop structural and hydraulic design, project management and ethical engineering practice. Best suited to learners who like Mathematics and Physics and want to build the infrastructure South Africa needs. Leads to registration with ECSA. Jobs: Civil Engineer (R25 000–R100 000/month); Structural Engineer (R28 000–R110 000/month); Project Engineer (R26 000–R105 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]]},

{ name: "BSc in Computational Science", aps: 26, duration: "3 years", description: "Blends applied mathematics with high-performance computing. You learn numerical

analysis, modelling, simulation, algorithms and scientific programming used in engineering, physics, climate science and data analysis. Graduates develop computational modelling, programming and numerical problem-solving. Best suited to learners who enjoy both Mathematics and coding and want to solve large-scale scientific problems. Jobs: Computational Scientist (R22 000–R95 000/month); Simulation Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computer Science", aps: 32, duration: "3 years", description: "Covers programming (Python, Java, C++), data structures and algorithms, databases, operating systems, computer networks, software engineering and the theory of computation. Most programmes add electives such as artificial intelligence, machine learning, computer graphics, cloud computing and cybersecurity, plus a major software project in the final year. Mathematics (discrete maths, calculus, linear algebra, statistics) runs alongside as the foundation. Graduates develop problem decomposition, clean and efficient coding, system design, teamwork on large software projects and the mathematical reasoning that underpins modern computing. Best suited to learners who enjoy logic puzzles and building things with code, and who are comfortable with Mathematics. Graduates work across banking, telecoms, start-ups, government and the fast-growing global remote tech market, or continue to a Hons/Master's in AI and data science. Jobs: Software Developer (R22 000–R95 000/month); Systems Analyst (R20 000–R80 000/month); IT Consultant (R25 000–R110 000/month); Web Developer (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computer Science (Extended Curriculum)", aps: 32, duration: "4 years", description: "A four-year extended route into Computer Science that adds a foundation year of academic support, mathematics and problem-solving before the standard programming, algorithms, data-structures, databases and operating-systems curriculum. Graduates develop strong logical thinking, programming fluency and study skills that carry through to the final year. Best suited to learners who love technology but whose Mathematics results fall just short of the mainstream entry requirement. Jobs: Software Developer (R20 000–R88 000/month); Systems Analyst (R22 000–R84 000/month); IT Consultant (R22 000–R96 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Conservation Biology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates

develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Conservation Officer (R14 000–R55 000/month); Wildlife Manager (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Construction Management", aps: 28, duration: "3 years", description: "Covers construction technology, project and site management, contracts, safety and cost control. Typical modules include construction technology, building contracts, cost estimation, health and safety, and project management. Graduates develop managing builders, budgets and schedules. Best suited to learners who want to run building projects. Jobs: Construction Manager (R25 000–R100 000/month); Site Agent (R20 000–R75 000/month); Quantity Surveyor (junior) (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Cybersecurity", aps: 32, duration: "3 years", description: "Covers network and systems security, cryptography, ethical hacking, digital forensics, secure software development, risk management and information-security law. Graduates develop threat analysis, penetration testing, incident response and secure system design. Best suited to learners who enjoy technology and want to defend organisations against cyber attacks. Demand for skilled security professionals far exceeds supply. Jobs: Cybersecurity Analyst (R22 000–R100 000/month); Security Consultant (R25 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Data Science", aps: 34, duration: "3 years", description: "Combines statistics, programming and machine learning to extract insight from large datasets. You study data wrangling, databases, statistical modelling, machine learning, data visualisation, big-data tools and ethics, usually with a capstone project on real data. Graduates develop Python/R programming, predictive modelling, data storytelling and cloud/data-engineering basics. Best suited to learners who enjoy Mathematics and coding and want one of the fastest-growing careers in banking, retail, health, telecoms and tech. Jobs: Data Scientist (R28 000–R120 000/month); Machine Learning Engineer (junior) (R30 000–R130 000/month); Business Intelligence Analyst (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Earth Sciences", aps: 26, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining,

exploration or environmental geology. Jobs: Earth Scientist (R18 000–R80 000/month); Geoscientist (R20 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Ecology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Genetic Counsellor pathway (R20 000–R80 000/month); Lab Geneticist (R18 000–R75 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }],

{ name: "BSc in Industrial Chemistry", aps: 30, duration: "3 years", description: "Applies chemistry to manufacturing, covering process chemistry, polymers, petrochemicals, materials and industrial safety and quality. Graduates develop process thinking, laboratory skills and plant-level problem-solving. Best suited to learners who want to work in chemical manufacturing, mining, fuels or water treatment. Jobs: Industrial Chemist (R18 000–R80 000/month); Process Chemist (R18 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BEng in Industrial Engineering", aps: 35, duration: "4 years", description: "Optimises complex systems of people, materials and information. Covers operations research, production planning, quality, logistics, ergonomics and data analytics. Graduates develop systems thinking, process improvement and decision analysis. Best suited to learners who want to make organisations run better in manufacturing, logistics, banking or consulting. Jobs: Industrial Engineer (R24 000–R100 000/month); Operations Analyst (R22 000–R90 000/month); Supply Chain Engineer (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Systems Management", aps: 30, duration: "3 years", description: "Links technology with business. You learn systems analysis and design, databases, programming, business process management, enterprise systems, IT governance and project management alongside core commerce modules. Graduates develop bridging IT and business needs, analysing processes and managing technology projects. Best suited to learners who like both business and technology and want to work as analysts, consultants or IT managers. Jobs: IT Manager pathway (R25 000–R100 000/month); Systems Coordinator (R16 000–R60 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Higher Certificate in Information Technology", aps: 18, duration: "1 year", description: "A one-year entry-level programme in computer literacy, programming basics, networks, databases and web design. Successful students can articulate into a Diploma in IT. Graduates develop practical IT skills, basic coding and user support. Best suited to learners who want a gentle, practical start in IT or who need a pathway to a diploma. Jobs: IT Support Assistant (R10 000–R28 000/month); Junior Computer Technician (R11 000–R30 000/month); Helpdesk Agent (R10 000–R25 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Technology", aps: 26, duration: "3 years", description: "Prepares you to develop, deploy and manage computer systems. You study programming, databases, web and mobile development, networks, systems analysis, information security and project management. Graduates develop software development, systems administration and practical problem-solving with technology. Best suited to learners who want a career building and supporting business systems. Jobs: IT Support Specialist (R14 000–R45 000/month); Network Administrator (R16 000–R60 000/month); Systems Administrator (R18 000–R70 000/month); Junior Cybersecurity Analyst (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly. Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in

data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80 000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematics (Extended Curriculum)", aps: 30, duration: "4 years", description: "A four-year extended route into Mathematics that begins with a foundation year in algebra, calculus and proof-based reasoning before moving into the full three-year curriculum. Graduates develop rigorous reasoning, problem-solving and confident mathematical communication. Best suited to learners with real potential in Mathematics who benefit from a smaller, more supported first year. Jobs: Data Analyst (R20 000–R80 000/month); Actuarial Analyst (R22 000–R90 000/month); Quantitative Analyst (R28 000–R110 000/month); Mathematics Teacher (with PGCE) (R20 000–R52 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BEng Tech in Mechanical Engineering", aps: 35, duration: "4 years", description: "Covers mechanics, thermodynamics, fluid dynamics, materials, machine design and manufacturing, with computer-aided design (CAD) and workshop experience. Graduates develop mechanical design, thermal systems analysis and project problem-solving. Best suited to learners who like designing and improving machines, engines and energy systems. Jobs: Mechanical Engineer (R25 000–R96 000/month); Design Engineer (R24 000–R91 000/month); Maintenance Engineer (R22 000–R84 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }] },

Modules include structural analysis, geotechnics, hydraulics, transport engineering and construction management. Graduates develop structural and hydraulic design, project management and ethical engineering practice. Best suited to learners who like Mathematics and Physics and want to build the infrastructure South Africa needs. Leads to registration with ECSA. Jobs: Civil Engineer (R25 000–R100 000/month); Structural Engineer (R28 000–R110 000/month); Project Engineer (R26 000–R105 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 60 }, {

subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computational Science", aps: 26, duration: "3 years", description: "Blends applied mathematics with high-performance computing. You learn numerical analysis, modelling, simulation, algorithms and scientific programming used in engineering, physics, climate science and data analysis. Graduates develop computational modelling, programming and numerical problem-solving. Best suited to learners who enjoy both Mathematics and coding and want to solve large-scale scientific problems. Jobs: Computational Scientist (R22 000–R95 000/month); Simulation Analyst (R20 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Computer Science", aps: 32, duration: "3 years", description: "Covers programming (Python, Java, C++), data structures and algorithms, databases, operating systems, computer networks, software engineering and the theory of computation. Most programmes add electives such as artificial intelligence, machine learning, computer graphics, cloud computing and cybersecurity, plus a major software project in the final year. Mathematics (discrete maths, calculus, linear algebra, statistics) runs alongside as the foundation. Graduates develop problem decomposition, clean and efficient coding, system design, teamwork on large software projects and the mathematical reasoning that underpins modern computing. Best suited to learners who enjoy logic puzzles and building things with code, and who are comfortable with Mathematics. Graduates work across banking, telecoms, start-ups, government and the fast-growing global remote tech market, or continue to a Hons/Master's in AI and data science. Jobs: Software Developer (R22 000–R95 000/month); Systems Analyst (R20 000–R80 000/month); IT Consultant (R25 000–R110 000/month); Web Developer (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Conservation Biology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Conservation Officer (R14 000–R55 000/month); Wildlife Manager (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Construction Management", aps: 28, duration: "3 years", description: "Covers construction technology, project and site management, contracts,

safety and cost control. Typical modules include construction technology, building contracts, cost estimation, health and safety, and project management. Graduates develop managing builders, budgets and schedules. Best suited to learners who want to run building projects. Jobs: Construction Manager (R25 000–R100 000/month); Site Agent (R20 000–R75 000/month); Quantity Surveyor (junior) (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Cybersecurity", aps: 32, duration: "3 years", description: "Covers network and systems security, cryptography, ethical hacking, digital forensics, secure software development, risk management and information-security law. Graduates develop threat analysis, penetration testing, incident response and secure system design. Best suited to learners who enjoy technology and want to defend organisations against cyber attacks. Demand for skilled security professionals far exceeds supply. Jobs: Cybersecurity Analyst (R22 000–R100 000/month); Security Consultant (R25 000–R120 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Data Science", aps: 34, duration: "3 years", description: "Combines statistics, programming and machine learning to extract insight from large datasets. You study data wrangling, databases, statistical modelling, machine learning, data visualisation, big-data tools and ethics, usually with a capstone project on real data. Graduates develop Python/R programming, predictive modelling, data storytelling and cloud/data-engineering basics. Best suited to learners who enjoy Mathematics and coding and want one of the fastest-growing careers in banking, retail, health, telecoms and tech. Jobs: Data Scientist (R28 000–R120 000/month); Machine Learning Engineer (junior) (R30 000–R130 000/month); Business Intelligence Analyst (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Earth Sciences", aps: 26, duration: "3 years", description: "Studies the structure and history of the Earth, including minerals, rocks, geochemistry, structural geology, palaeontology and field mapping. Strong links to mining and exploration. Graduates develop field mapping, mineral identification and geospatial analysis. Best suited to learners who love the outdoors and want careers in mining, exploration or environmental geology. Jobs: Earth Scientist (R18 000–R80 000/month); Geoscientist (R20 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Ecology", aps: 28, duration: "3 years", description: "Studies ecosystems, biodiversity and how species interact with their environment. Includes fieldwork, population biology, conservation planning and GIS. Graduates develop field

research, ecological monitoring and environmental data analysis. Best suited to learners who want to protect wildlife and natural ecosystems. Jobs: Ecologist (R16 000–R65 000/month); Conservation Scientist (R16 000–R60 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BEng in Electrical Engineering", aps: 35, duration: "4 years", description: "Covers circuits, electronics, power systems, control, signal processing, telecommunications and renewable energy, with extensive lab work and a final-year design project. Graduates develop circuit and systems design, programming and energy-systems analysis. Best suited to learners who enjoy Maths and Physics, and who want to work in energy, telecoms, mining and electronics. Strong demand with the shift to renewable energy. Jobs: Electrical Engineer (R25 000–R105 000/month); Power Systems Engineer (R28 000–R115 000/month); Electronics Engineer (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Electronics", aps: 26, duration: "3 years", description: "Covers analogue and digital electronics, circuits, microcontrollers, instrumentation and embedded systems, with strong hands-on practicals. Graduates develop circuit design, prototyping and troubleshooting. Best suited to learners who enjoy building and repairing electronic devices. Jobs: Electronics Technician (R14 000–R55 000/month); Electronics Engineer pathway (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Environmental Management", aps: 26, duration: "3 years", description: "Examines how people interact with the environment: ecology, pollution, climate change, environmental law, impact assessment and sustainable resource management. Graduates develop environmental assessment, GIS and policy analysis. Best suited to learners who want to tackle climate, water and sustainability challenges. Jobs: Business Administrator (R14 000–R49 000/month); Operations Coordinator (R15 000–R56 000/month); Junior Manager (R18 000–R70 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 50 }, { subject: "Life Sciences OR Geography", minPercent: 50 }] },

{ name: "BSc in Environmental Science", aps: 28, duration: "3 years", description: "Examines how people interact with the environment: ecology, pollution, climate change, environmental law, impact assessment and sustainable resource management. Graduates develop environmental assessment, GIS and policy analysis. Best suited to learners who want to tackle climate, water and sustainability challenges.

Jobs: Environmental Officer (R16 000–R55 000/month); Environmental Consultant (R18 000–R70 000/month); Sustainability Coordinator (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Financial Mathematics", aps: 34, duration: "3 years", description: "Combines mathematics, statistics and finance to price financial instruments and manage risk. Modules cover stochastic calculus, derivative pricing, portfolio theory, probability, numerical methods and programming. Graduates develop quantitative modelling, risk assessment and programming for financial applications. Best suited to learners who are strong in Mathematics and interested in banking, asset management and quantitative finance. Jobs: Quantitative Analyst (R28 000–R130 000/month); Financial Modeller (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Forensic Science", aps: 26, duration: "3 years", description: "Applies chemistry, biology and physics to criminal investigation, including DNA analysis, toxicology, crime-scene examination and evidence handling. Graduates develop evidence analysis, laboratory accuracy and expert report writing. Best suited to learners who want to work with the police, state laboratories or private forensic services. Jobs: Forensic Analyst (R18 000–R55 000/month); Crime Scene Investigator (R16 000–R48 000/month); Forensic Laboratory Scientist (R20 000–R65 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences OR Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

{ name: "BSc in Genetics", aps: 30, duration: "3 years", description: "Studies heredity, genomes and genetic disease, including molecular genetics, population genetics, genomics and bioinformatics, with practical laboratory work. Graduates develop DNA analysis, bioinformatics and critical scientific thinking. Best suited to learners interested in genetic research, diagnostics and personalised medicine. Jobs: Geneticist (R20 000–R90 000/month); Lab Scientist (R16 000–R65 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }]],

Covers operations research, production planning, quality, logistics, ergonomics and data analytics. Graduates develop systems thinking, process improvement and decision analysis. Best suited to learners who want to make organisations run better in manufacturing, logistics, banking or consulting. Jobs: Industrial Engineer (R24 000–R100 000/month); Operations Analyst (R22 000–R90 000/month); Supply Chain Engineer (R24 000–R95

000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Systems Management", aps: 30, duration: "3 years", description: "Links technology with business. You learn systems analysis and design, databases, programming, business process management, enterprise systems, IT governance and project management alongside core commerce modules. Graduates develop bridging IT and business needs, analysing processes and managing technology projects. Best suited to learners who like both business and technology and want to work as analysts, consultants or IT managers. Jobs: IT Manager pathway (R25 000–R100 000/month); Systems Coordinator (R16 000–R60 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Higher Certificate in Information Technology", aps: 18, duration: "1 year", description: "A one-year entry-level programme in computer literacy, programming basics, networks, databases and web design. Successful students can articulate into a Diploma in IT. Graduates develop practical IT skills, basic coding and user support. Best suited to learners who want a gentle, practical start in IT or who need a pathway to a diploma. Jobs: IT Support Assistant (R10 000–R28 000/month); Junior Computer Technician (R11 000–R30 000/month); Helpdesk Agent (R10 000–R25 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Information Technology", aps: 26, duration: "3 years", description: "Prepares you to develop, deploy and manage computer systems. You study programming, databases, web and mobile development, networks, systems analysis, information security and project management. Graduates develop software development, systems administration and practical problem-solving with technology. Best suited to learners who want a career building and supporting business systems. Jobs: IT Support Specialist (R14 000–R45 000/month); Network Administrator (R16 000–R60 000/month); Systems Administrator (R18 000–R70 000/month); Junior Cybersecurity Analyst (R18 000–R65 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Life Sciences", aps: 28, duration: "3 years", description: "A flexible biology degree covering cell biology, genetics, ecology, physiology, evolution, plant and animal biology with fieldwork and laboratory practicals. Graduates develop scientific investigation, fieldwork and data analysis. Best suited to learners who love living things and want options in research, conservation, health or education. Jobs: Laboratory

Technician (R14 000–R49 000/month); Research Assistant (R14 000–R53 000/month); Environmental Officer (R16 000–R61 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 50 }, { subject: "Life Sciences", minPercent: 50 }] },

{ name: "BSc in Maritime Studies", aps: 26, duration: "3 years", description: "Studies shipping, ports, navigation, maritime law and ocean industries. Graduates develop maritime operations and regulatory knowledge. Best suited to learners who want careers in shipping and port logistics. Jobs: Ship Agent / Port Officer (R16 000–R55 000/month); Maritime Operations Coordinator (R15 000–R50 000/month); Fleet Operations Assistant (R14 000–R48 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Materials Science", aps: 26, duration: "3 years", description: "Studies metals, ceramics, polymers and composites: their structure, properties and processing. Links physics, chemistry and engineering. Graduates develop materials testing, characterisation and problem-solving for industry. Best suited to learners who want to work in manufacturing, mining and advanced technology. Jobs: Materials Scientist (R22 000–R95 000/month); Metallurgist pathway (R24 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematical Statistics", aps: 30, duration: "3 years", description: "Builds the theory behind data analysis: probability, distribution theory, statistical inference, regression, stochastic processes and multivariate methods, supported by calculus and linear algebra. Statistical software (R, Python, SAS) is used throughout. Graduates develop rigorous statistical reasoning, modelling of uncertainty and fluency with statistical software. Best suited to learners who enjoy Mathematics and are curious about what data can really tell us. A popular route into actuarial science, data science, research and risk analysis. Jobs: Mathematical Statistician (R25 000–R105 000/month); Risk Modeller (R26 000–R110 000/month); Analytics Specialist (R24 000–R95 000/month).", requirements: [{ subject: "Mathematics", minPercent: 65 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Mathematics", aps: 30, duration: "3 years", description: "Studies the language of patterns and structure. Core modules include calculus, linear algebra, real and complex analysis, abstract algebra, differential equations, discrete mathematics and probability, with electives in statistics, applied mathematics or computer science. Strong students can continue to Honours, Master's and PhD research, or enter teaching (with a PGCE). Graduates develop abstract and logical reasoning, rigorous proof-writing, analytical problem-solving and the ability to learn any quantitative field quickly.

Best suited to learners who enjoy Mathematics for its own sake. Graduates are valued in data science, finance, actuarial work, cryptography, research, teaching and technology. Jobs: Mathematician (R22 000–R85 000/month); Data Analyst (R20 000–R80 000/month); Quantitative Analyst (R28 000–R120 000/month); Actuarial Support Analyst (R22 000–R75 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BEng in Mechanical Engineering", aps: 35, duration: "4 years", description: "Covers mechanics, thermodynamics, fluid dynamics, materials, machine design and manufacturing, with computer-aided design (CAD) and workshop experience. Graduates develop mechanical design, thermal systems analysis and project problem-solving. Best suited to learners who like designing and improving machines, engines and energy systems. Jobs: Mechanical Engineer (R25 000–R100 000/month); Design Engineer (R24 000–R95 000/month); Maintenance Engineer (R22 000–R85 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Microbiology", aps: 30, duration: "3 years", description: "Studies bacteria, viruses, fungi and other microbes in health, industry and the environment, covering immunology, virology, biotechnology and laboratory methods. Graduates develop aseptic laboratory technique, diagnostic skills and data interpretation. Best suited to learners interested in disease, food safety, public health and biotechnology. Jobs: Microbiologist (R18 000–R70 000/month); Quality Assurance Officer (R15 000–R55 000/month); Biotech Technician (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Molecular Biology", aps: 26, duration: "3 years", description: "Studies DNA, RNA, proteins and cell processes through genetics, genomics, bioinformatics and advanced laboratory techniques. Graduates develop molecular laboratory skills and data analysis. Best suited to learners curious about how genes and cells work. Jobs: Molecular Biologist (R18 000–R80 000/month); Research Assistant (R14 000–R50 000/month).", requirements: [{ subject: "Life Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Physics", aps: 30, duration: "3 years", description: "Explores matter, energy, motion and the universe. Modules include mechanics, electromagnetism, quantum physics, thermodynamics, optics and mathematical physics, with laboratory and computational work. Graduates develop experimental technique, mathematical modelling and quantitative problem-solving. Best suited to learners who ask how things

work. Graduates go into engineering, energy, medical physics, data analysis, research and teaching. Jobs: Physicist (R22 000–R90 000/month); Laboratory Scientist (R18 000–R70 000/month); Radiation Protection Officer (R20 000–R80 000/month); Physics Teacher (after PGCE) (R18 000–R45 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "Physical Sciences", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Software Engineering", aps: 32, duration: "3 years", description: "Teaches how to design, build, test and maintain large software systems. You study programming, requirements analysis, software architecture, testing, DevOps, databases, mobile and web development and agile project management. Graduates develop professional coding practices, teamwork, system design and delivery of working software. Best suited to learners who want a practical, build-things route into the software industry. Jobs: Software Engineer (R24 000–R110 000/month); Full-Stack Developer (R22 000–R100 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Statistics", aps: 26, duration: "3 years", description: "Teaches how to collect, analyse and interpret data. Modules include descriptive and inferential statistics, probability, regression, experimental design, sampling, time-series analysis and statistical programming in R or Python. Graduates develop data analysis, interpretation of results, clear reporting of findings and use of professional statistical software. Best suited to learners who want a career turning numbers into decisions in health, finance, government, marketing or research. Jobs: Statistician (R22 000–R95 000/month); Biostatistician (R25 000–R100 000/month); Survey Methodologist (R20 000–R75 000/month); Data Scientist (junior) (R22 000–R90 000/month).", requirements: [{ subject: "Mathematics", minPercent: 60 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "Bachelor of Town and Regional Planning", aps: 28, duration: "4 years", description: "Studies how cities and regions are planned: land use, transport, housing, urban design, environmental planning and planning law. Typical modules include urban design, land-use management, transport planning, housing and planning law. Graduates develop spatial analysis, public engagement and policy design. Best suited to learners who want to shape inclusive, sustainable settlements. Jobs: Town Planner (R20 000–R80 000/month); Urban Planning Officer (R18 000–R65 000/month); Development Control Planner (R19 000–R70 000/month).", requirements: [{ subject: "Mathematics OR Mathematical Literacy", minPercent: 40 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] },

{ name: "BSc in Water Science", aps: 26, duration: "3 years", description: "Studies the quantity, quality and management of water resources, covering hydrology, hydrogeology, water chemistry, treatment and catchment management. Graduates develop water monitoring, modelling and resource-management skills. Best suited to learners who want to work on water security, which is critical for South Africa. Jobs: Water Scientist (R16 000–R65 000/month); Water Quality Officer (R14 000–R55 000/month).", requirements: [{ subject: "Mathematics", minPercent: 50 }, { subject: "English Home Language OR English First Additional Language", minPercent: 50 }] }
